Department of Computer Science and Business Systems

Academic Year 2024 – 2025 (Odd Semester)

Degree, Semester & Branch: III Semester B.Tech. CSBE Course Code & Title: CW3501 & Fundamentals of Mangement

Name of the Faculty member (s): Mrs.M.Jeya Sundari, AP/CSBE

Innovative Practice Description

- **Unit / Topic: Unit I / System Approach**
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO1
- **Activity Chosen: Flipped class room**
- **Justification:**
  The system approach is a management and problem-solving methodology that views an organization or a project as a complex system of interconnected parts. It encourages in business field looking at the entire system rather than focusing on individual components, leading to a better understanding of how different parts interact and affect overall performance.

- **Time Allotted for the Activity: 45 Minutes**

- **Details of the Implementation:**
  - Clearly outline what students should achieve by the end of the course. These objectives should integrate knowledge, skills, and attitudes.
  - Create or curate engaging video lectures, readings, and other resources that provide foundational knowledge. Ensure these materials are accessible and varied (e.g., videos, podcasts, articles).
  - Plan activities that reinforce the pre-class materials. These could include discussions, group projects, case studies, and hands-on exercises. Ensure activities require application of knowledge and promote collaboration.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PSO1	PSO2	PSO3
CO1	3	3	2	3	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	**PO1**	**PO2**	**PO3**	**PSO1**	**PSO2**	**POS3**
	3	**3**	**1**	**1**	**1**	**1**
Justification for correlation	In-class activities encourage students to use what they learned in real-world scenarios or problem-solving exercises.	Emphasizing teamwork and communication, essential skills for success in both academic and professional settings.	Encouraging active engagement in problem-solving and critical analysis during class activities.	Perspective enhances their ability to integrate knowledge across disciplines.	Group activities that require students to work together on business-related projects enhance their communication, leadership, and decision-making skills.	Explore how theoretical concepts apply in industry contexts, enhancing students' understanding of industry dynamics.

- ***Feedback of practice from students and other stakeholders:***
    - Student felt good, since they can study at their own pace/time.
    - They felt that through such learning, they can explore more.
- ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due toinnovative practice over conventional practice)
    - More one-to-one time between teacher and student.
    - More collaboration time for students.
    - Students learn at their own pace.
    - Practical things – like missing class due to illness – become less problematic.
    - It encourages students to come to class prepared.
- ***Challenges faced in implementation:***
    - Relies on student preparation – few students did not come prepared.
    - The depth of the subject can be dictated by the student themselves or the group thestudent is working with.
    - The time and effort required from a teacher's perspective initially when creating theflipped class material is higher than for a traditional class.
