RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Information Technology

Academic Year 2025– 2026 (Odd Semester)

Degree, Semester & Branch: V Semester B.Tech. IT
Course Code & Title: CCS334 & Big Data Analytics
Name of the Faculty member (s): Mrs.M.Rethina Kumari

Innovative Practice Description

Unit / Topic: Unit 1/ Mobile Business Intelligence

Course Outcome: CO1

Activity Chosen: Think Pair Share

Justification:

- Think-Pair-Share activity encourages students to **think critically, collaborate**, and communicate their understanding about real-world topics like Mobile BI.
- Mobile Business Intelligence (MBI) uses real-time data and mobile platforms to drive **faster decision-making**, **improve responsiveness**, and **enhance business strategy**.
- The activity allows students to break down complex ideas such as **intelligent data access**, **user-friendly interfaces**, and **personalized dashboards**, exploring how these features help businesses stay competitive.

Time Allotted for the Activity: 15 minutes
Details of the Implementation:

- The instructor provided an overview of **Mobile Business Intelligence** concepts, including key features, use cases, and tools, over 30 minutes.
- A triggering question was given to all students:
  "How do mobile applications become intelligent and support business strategy?"
- **Think:** Students reflected individually for 3–4 minutes, noting how mobile BI applications can support analytics, real-time access, GPS/location-based decisions, and business agility.
- **Pair:** Students formed pairs to discuss their observations. Each pair exchanged ideas about:
  - ✓ Integration of **AI/ML** into mobile apps
  - ✓ Real-time alerts & notifications
  - ✓ Role of **data visualization** in mobile apps
  - ✓ Business cases (e.g., retail, logistics, healthcare)
- **Share:** Each pair presented a summary to the class. The instructor moderated, clarified concepts, and provided industry examples.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO 4	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
	2	1	1	1	1	1
Justification for correlation	Enhances critical thinking through the analysis of intelligent business apps.	Encourages application of data analytics and real-time decision-making strategies.	Fosters solution-oriented thinking for mobile-based business problems.	Team discussion improves collaboration and mutual learning	Sharing answers builds communication and articulation skills.	Aligns with practical application of Big Data tools in business mobile solutions.

Glimpse of Think Pair Share Activity

Figure1 and 2 shows the Think and Pair Timing, Figure.3 and 4 shows discussion of Students Gowtham -Gopi & Abinaya.G.M-Ashika pair explaining their discussion to the class.

❖ **Feedback of practice from students and other stakeholders:**

- Students found the session interactive and relevant to industry applications.
- The Think-Pair-Share format helped in **breaking down complex business strategies** linked to mobile BI.
- Peer discussions clarified doubts on technical integrations (e.g., GPS tracking, cloud sync).

❖ **Benefit of the practice:**

- Students gained **confidence in explaining mobile BI features**.
- Improved **classroom engagement and participation**.
- Strengthened understanding of **how intelligent apps assist real-time decision-making**.

❖ **Challenges faced in implementation:**

- A few students found it difficult to relate technical tools with business cases.
- Some teams needed additional prompting to initiate discussions.
- Time was slightly insufficient for in-depth idea sharing—extra 5 minutes would improve effectiveness.
