

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018- 2019 (Odd Semester)

Innovative Practices Description

UNIT II (EMBEDDED COMPUTING PLATFORM DESIGN)

Degree, Semester& Branch: VII Semester B.E. ECE A

Course Code & Title: EC6703 Embedded and Real Time Systems

Name of the Faculty member: Mr.T.Ramprakash

Name of the Topic: Assembly, Linking and Loading

Name of the Innovative Practice: Animated Videos

Description:

The video will explain clearly about the operation of assembler, linker and loader. It clearly differentiates the working of compiler and assembler. Many of the students confuse the operation of Assembler, Linker and Loader. They confuse the compiler operation with Assembler and Assembler operation with linker. So if visualization is shown regarding this topic, the confusion would be rectified. The topic was first handled and then the video was shown and almost all the students were able to relate the working operation of Compiler, Assembler, Linker and Loader.
