

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018- 2019 (Even Semester)

Innovative Practices Description

UNIT I (MOS TRANSISTOR PRINCIPLE)

Degree, Semester& Branch: VI Semester B.E. ECE B

Course Code & Title: EC6601 & VLSI Design

Name of the Faculty member: Mr.S.Vijayakumar

Name of the Topic: IC fabrication from sand

Name of the Innovative Practice: Animation video

Description:

Animation is a brilliant and innovative new way to encourage students to communicate stories, ideas and concepts in a creative and original way. It can be particularly useful as a tool to encourage the creativity of students. Animated videos are a one stop solution that can grab the attention of the students. With its entertaining visuals, it can clearly comprehend the concept. Since it is an analogy to cartoons, students will get hooked to it. By using animation videos, students learn analytical thinking as to how to present a scenario.

Video explain how Integrated circuits are made from silica available in sand. Animation videos of different IC fabrication companies such as Global foundries, TSMC, Intel foundries etc. are shown to the students.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	1	-	-	-	-	-	-	1	1	1	-	-

CO1: The students will be able to explain the basic characteristics of MOSFET and different CMOS process technologies
