

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018- 2019 (Odd Semester)

Innovative Practices Description

UNIT III (OPTICAL DETECTION DEVICES)

Degree, Semester & Branch: VII Semester B.E. ECE A & B

Course Code & Title: EC6016 & Opto Electronic Devices

Name of the Faculty member: Mr.S.Vijayakumar

Name of the Topic: Photodiode

Name of the Innovative Practice: Animation video

Description:

A special type of PN junction device that generates current when exposed to light is known as Photodiode. It is also known as photodetector or photosensor. It operates in reverse biased mode and converts light energy into electrical energy.

Animation is a brilliant and innovative new way to encourage students to communicate stories, ideas and concepts in a creative and original way. It can be particularly useful as a tool to encourage the creativity of students. Animated videos are a one stop solution that can grab the attention of the students. With its entertaining visuals, it can clearly comprehend the concept. Since it is an analogy to cartoons, students will get hooked to it. By using animation videos, students learn analytical thinking as to how to present a scenario.

Animation videos show that conversion of optical energy to electrical energy by involving the movement of electrons and holes.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO3	2	1	-	-	-	-	-	1	1	1	-	-

CO3: The students will be able to describe the various optical detection devices
