

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018 - 2019 (Even Semester)

Innovative Practices Description

UNIT II (APERTURE AND SLOT ANTENNAS)

Degree, Semester & Branch: VI Semester B.E. ECE B

Course Code & Title: EC6602 Antenna and Wave Propagation

Name of the Faculty member: Mr.P.Venkatesh

Name of the Topic: Aperture Antenna

Name of the Innovative Practice: Hardware Demonstration

Description:

An Antenna with an aperture at the end can be termed as an Aperture antenna. Waveguide is an example of aperture antenna. The edge of a transmission line when terminated with an opening, radiates energy. This opening which is an aperture, makes it an Aperture antenna.

The main types of aperture antennas are –

- Wave guide antenna
- Horn antenna
- Slot antenna

The picture of the hardware shows the various parts of the horn antenna. Its dimensions, shape and size are also shown and explained.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	1	1	-	-	1	-	-	1	1	1	-	1

CO1: The students will be able to analyze the basic antenna parameters and radiations from dipole antennas.
