

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018-2019 (Even Semester)

Innovative Practices Description

Degree, Semester & Branch: II Semester B.E. ECE B

Course Code & Title: EC8252 Electronic Devices

Name of the Faculty member: Mr.B.Kannan

Name of the Topic: PN Junction Diode

Name of the Innovative Practice: Animated Video

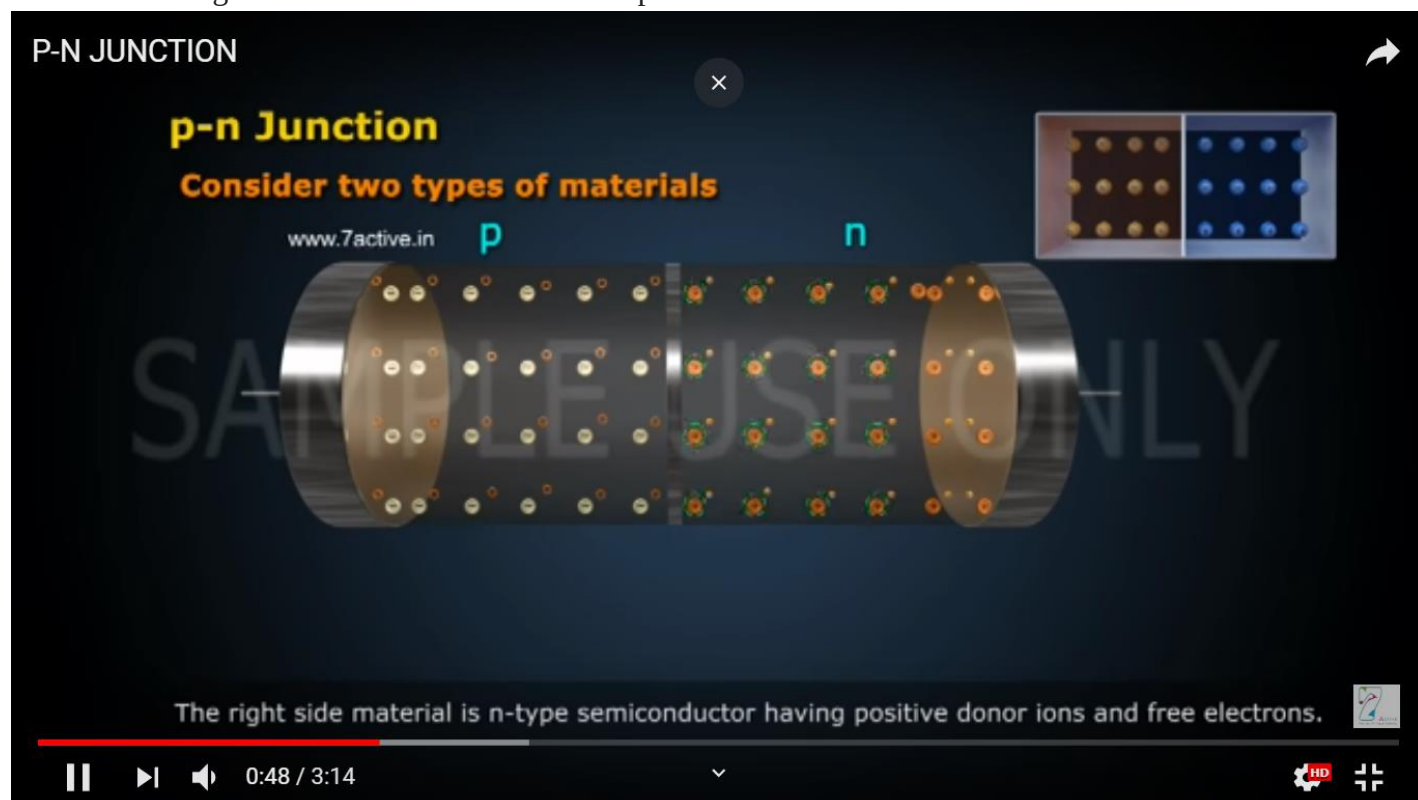

Unit: V

Animation:

1. The popularity of using animations to help learners understand and remember information has greatly increased since the advent of powerful graphics-oriented computers.
2. In classrooms, animated learning material can be leveraged for a variety of purposes, like
 - ❖ Explaining complex and challenging concepts in easy to comprehend manner.
 - ❖ Making learning more enjoyable experience for even poorly performing students.
 - ❖ Presenting things in completely new perspective.

Benefits of Animation:

- ❖ Enables students to understand the value of reflection and critical judgment in creative work.
- ❖ Facilitates positive peer interaction, including receiving and using feedback.
- ❖ Encourages self-motivation to create and problem solve.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	1	1	-	-	-	-	-	1	1	1

CO1: The students will be able to explain the structure, operations and characteristics of PN Junction diode.
