

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018- 2019 (Even Semester)

Innovative Practices Description

Unit-II Media Access & Internetworking

Degree, Semester & Branch: VI Semester B.E. ECE A

Course Code & Title: CS6551 Computer Networks

Name of the Faculty member: Mr.K.Ragavan

Name of the Topic: Bluetooth

Name of the Innovative Practice: Real Time Applications

ICT Tool Used: LCD Projector

Description:

A Bluetooth technology is a high speed low powered wireless technology link that is designed to connect phones or other portable equipment together. It is a specification (IEEE 802.15.1) for the use of low power radio communications to link phones, computers and other network devices over short distance without wires. Wireless signals transmitted with Bluetooth cover short distances, typically up to 30 feet (10 meters). It supports on the frequency band of 2.45GHz. Bluetooth can connect up to “eight devices” simultaneously and each device offers a unique 48 bit address from the IEEE 802 standard with the connections being made point to point or multipoint.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO2	2	1		2				1		1		1
