

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2018 - 2019 (Even Semester)

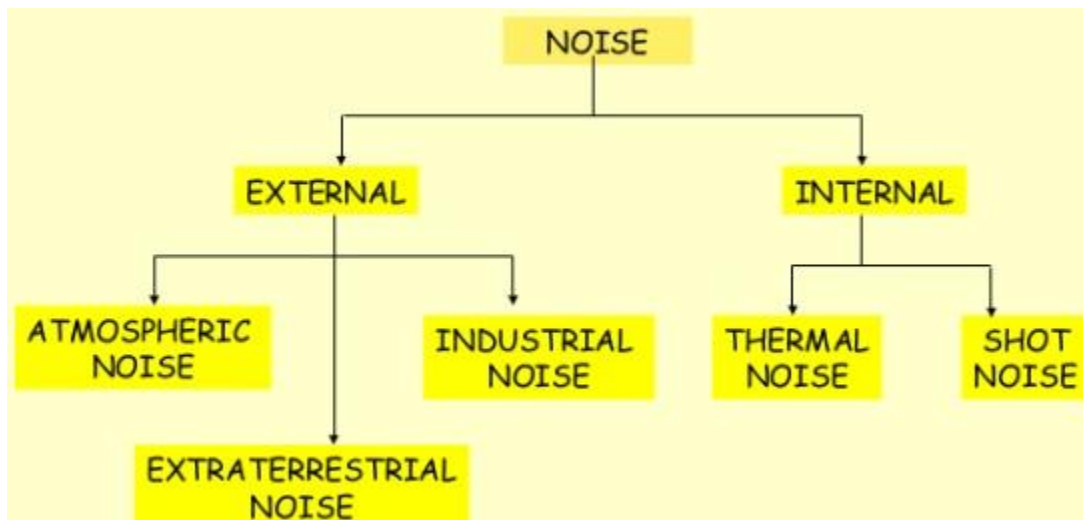

Innovative Practices Description

UNIT IV NOISE CHARACTERIZATION

Degree, Semester& Branch: IV Semester B.E. ECE A
Course Code & Title: EC8491 Communication Theory
Name of the Faculty member: Mrs.G.Gnana Priya
Name of the Topic: Types of Noise
Name of the Innovative Practice: Real time examples

Description:

Noise in electrical terms may be defined as any unwanted introduction of energy tending to interfere with the proper reception and reproduction of transmitted signals. In general noise in communication system may be classified as external noise and internal noise which is again classified as atmospheric noise, industrial noise, extra-terrestrial noise, thermal noise, shot noise etc., For better understanding about this topic, real time examples were given to the students.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO4	1					1	1	2		1		1

CO4: The students will be able to analyze the noise performance of AM and FM systems.
