

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2019- 2020 (Even Semester)

Innovative Practices Description

UNIT I (AC Circuits and Power Systems)

Degree, Semester & Branch: II Semester B.E ECE A

Course Code & Title: BE8254 Basic Electrical and Instrumentation Engineering

Name of the Faculty member: Mr.P.Gunasekaran

Name of the Topic: Three phase power supply, Star connection, Delta connection – Balanced Load

Name of the Innovative Practice: One Minute Paper

Date & Duration: 08.01.2020 & One Minute

Description:

This method used at the end of class for assessing student performance. Advantage of this technique is that it provides quick feedback on whether the concept is reached to the students. Additionally, by asking students to add a question at the end, this assessment becomes an integrative task. Sometimes, instead of asking for the main point, a professor may wish to probe for the most disturbing or most surprising item.

Goals (Learning Outcomes):

- The students will be able to understand the concepts of Three phase power supply, Star connection, Delta connection – Balanced Load.

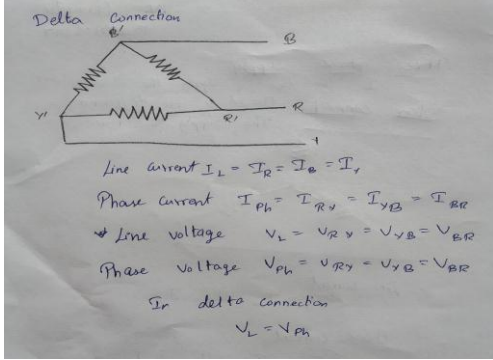

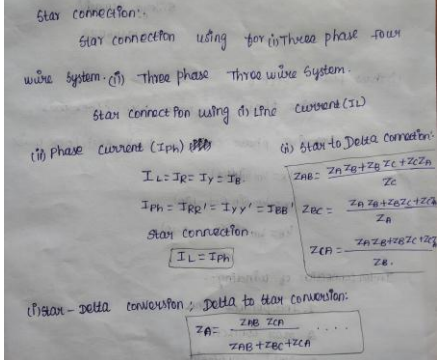

Use of appropriate methods:

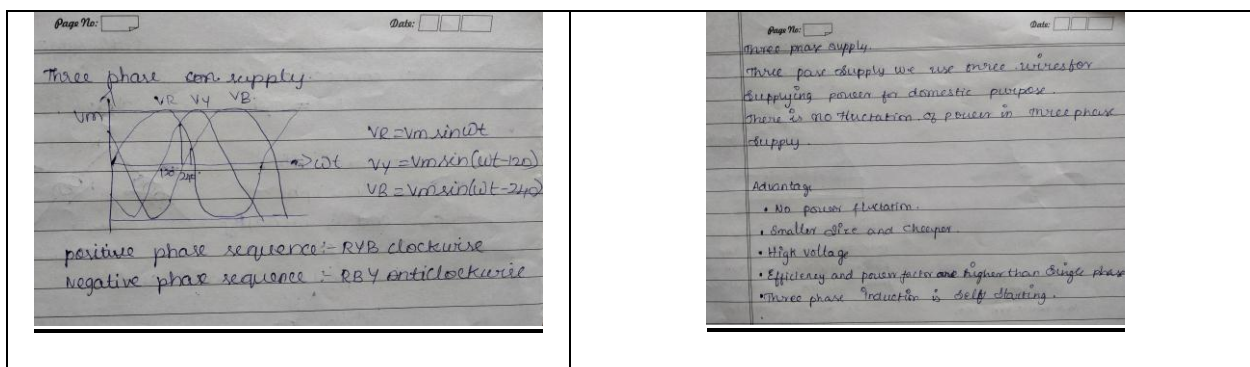

Justification for choosing the topic using One Minute Paper activity:

Three phase power supply is the important concept in Electrical Systems that helps the student to understand the working principles of power supply. Student can easily recall the topics covered in class at the end of class by implementing this one minute paper activity.

Effective presentation

Details of the Implementation:

	
---	--

Reflective Critique:

Benefits:

- Provide a “conceptual bridge” between successive class periods.
- Improve the quality of class discussion by having students write briefly about a concept or issue before they begin discussing it.
- Increase overall listening capability of the students.

Challenges:

Initially, I have planned this activity for only one minute but students were taken more than one minute, but it helps the students to remember all the fields. It ensures equal participation of each and every class member, including anyone who may be too shy or fearful to participate orally.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	1	-	-	2	-	-	-	-	-	-	1

CO1: The students will be able to explain the operation of three phase electrical circuits and power system.
