

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2019 - 2020 (Even Semester)

Innovative Practices Description

UNIT-I WIRELESS CHANNELS

Degree, Semester & Branch: VIII Semester B.E.ECE A

Course Code & Title: EC6801 Wireless Communication

Name of the Faculty member: Mrs.R.Ramalakshmi

Name of the Topic: Propagation mechanism

Name of the Innovative Practice: Sketch Noting

Date & Duration: 20.01.2020 & 10 Minutes

ICT Tool Used: Smart Class Room

Description:

Sketch noting is a form of note-taking, hence the “noting” part of it, but as we might guess it involves bringing more visuals into the process compared to typical note-taking, hence the “sketch” part. The whole idea behind adding sketches to our notes is that it taps into parts of our brain that would lie dormant if we only use words to explore ideas. It’s the combination of the two that’s most powerful – using both words and visuals while taking notes.

Goals (Learning Outcomes):

- The students will be able to know about the propagation mechanisms and its types

Use of appropriate methods:

Justification for choosing the topic using Sketch Noting activity:

The students will be able to understand the concepts of propagation mechanism and its types if he visualizes the concepts and able to write or note or sketch the points or drawings in the paper. The students will be able to easily remember the concepts if he is able to sketch the notes.

Effective presentation

Implementation(Plan & Execution) with Proof:

The students were in the class room. The topic was explained to the students first through the slides. Then they were asked to do sketch noting on the paper so that they could remember some points and diagrams. They were able to understand the concepts by doing sketch noting.

Innovative Teaching Method Execution

Sketch noting on “Propagation mechanism”

Significance of Results:

Assessment of Effectiveness/Success of the Activity:

- ✓ The assessment of effectiveness of the activity was felt when the students were asked questions on the topic on the next week they were able to answer easily

Reflective Critique:

• Benefits:

The students were more interested in learning the concepts if they are doing sketch noting the points. They clarified their doubts with the neighbouring students and the faculty. They learnt the concepts of propagation mechanism clearly by performing sketch noting. They asked more doubts in the topic and learnt many things.

• Challenges:

Basically some time is needed to explain the basic concepts of propagation mechanism. Then after explaining the students have to register the concepts in their mind and need to execute the concepts in terms of drawings or points in the paper.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2		1	1	1			1		2		1

Changes required for future (if required):-

CO1: The students will be able to elaborate the characteristics of a wireless channel and evolve the system design specifications

Academic Year: 2019 - 2020 (Even Semester)

Innovative Practices Description

UNIT-I WIRELESS CHANNELS

Degree, Semester & Branch: VIII Semester B.E.ECE A

Course Code & Title: EC6801 Wireless Communication

Name of the Faculty member: Mrs.R.Ramalakshmi

Name of the Topic: Doppler spread

Name of the Innovative Practice: Multimedia clip

Date & Duration: 03.02.2020 & 10 Minutes

ICT Tool Used: Smart Class Room

Description:

A media clip is a short segment of electronic media, either an audio clip or a video clip. Media clips may be promotional in nature, as with movie clips. Multimedia clip is used to visualize the concepts more clearly and understand the contents more quickly rather than teaching the concepts.

Goals (Learning Outcomes):

- The students will be able to know about the concepts of doppler spread more easily with the help of multimedia clip.

Use of appropriate methods:

Justification for choosing the topic using Multimedia clip activity:

The students will be able to understand the concepts of Doppler spread and fading types with the help of multimedia clip more easily. The students will be able to easily remember the concepts if he visualizes the concepts.

Effective presentation

Implementation(Plan & Execution) with Proof:

The students were in the class room. A multimedia clip was played to the students on the concerned topic. The students visualized the concepts and able to understand the concepts more easily.

Innovative Teaching Method Execution

Multimedia clip on “Doppler spread”

Significance of Results:

Assessment of Effectiveness/Success of the Activity:

- ✓ The assessment of effectiveness of the activity was felt when the students were asked questions on the topic on the next week they were able to answer easily

Reflective Critique:

• Benefits:

The students were more interested in learning the concepts if they are visualizing the concepts through multimedia clip. They clarified their doubts with the neighbouring students and the faculty. They learnt the concepts of Doppler spread. They asked more doubts in the topic and learnt many things.

• Challenges:

Basically some time is needed to explain the basic concepts of propagation mechanism to the slow learners after visualization so that they can clearly learn the concepts.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2		1	1	1			1		2		1
