

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2019- 2020 (Even Semester)

Innovative Practices Description

UNIT I (Wireless LAN)

Degree, Semester & Branch: VIII Semester B.E ECE B

Course Code & Title: EC6802 Wireless Networks

Name of the Faculty member: Mr.P.Gunasekaran

Name of the Topic: Bluetooth

Name of the Innovative Practice: Hardware Demonstration

Date & Duration: 12.01.2020 & 20 Minutes

ICT Tool Used: Desktop, Projector

Description:

A method demonstration is a teaching method used to communicate an idea with the aid of visuals such as flip charts, posters, power point, etc. A demonstration is the process of teaching someone how to make or do something in a step-by-step process.

The benefits of demonstration as a teaching method are a better learning experience in the classroom for students; the generation interest in the subject; help in developing the spirit of inquiry; students cooperating in the teaching-learning process; and the process of learning becoming permanent in the student's life.

Goals (Learning Outcomes):

- The students will be able to understand the concepts of Bluetooth technology.

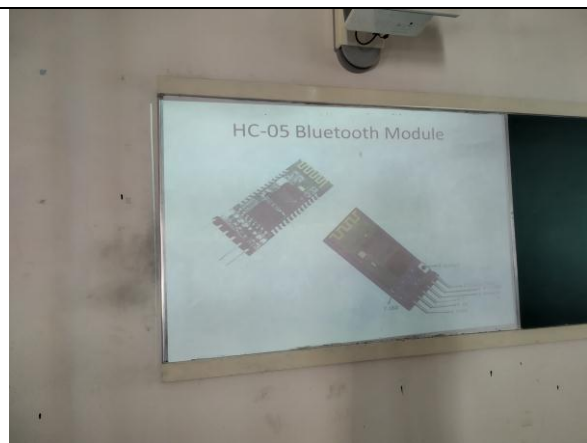

Use of appropriate methods:

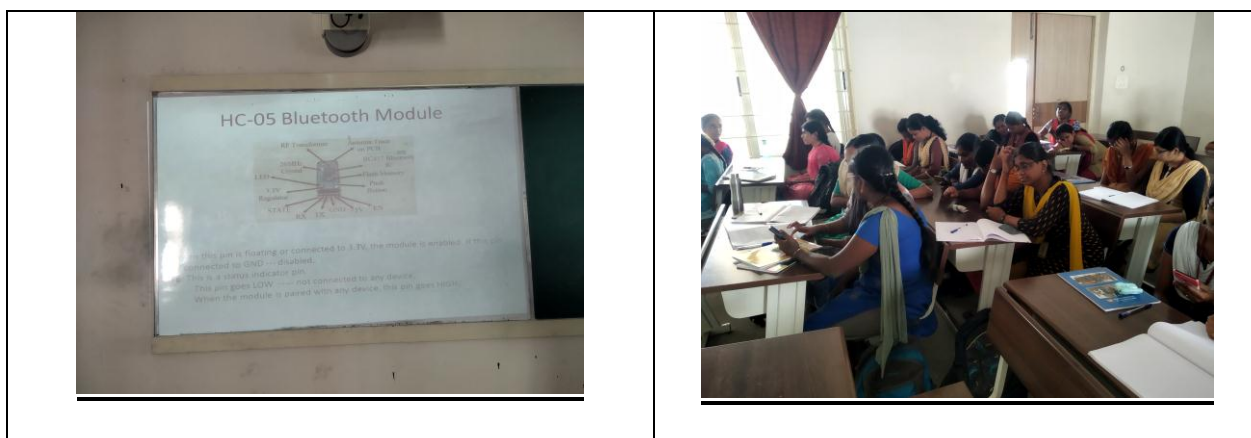

Justification for choosing the topic using One Minute Paper activity:

Actually, some of the students are not aware of Bluetooth hardware. In real time, they were used in mobile phones. For that, I have chosen hardware demonstration method to create the awareness of the Bluetooth technology with the real time applications to the students.

Effective presentation

Details of the Implementation:

Reflective Critique:

Benefits:

- While doing the demonstration, students identified the pins and the usages of each pins.
- The assessment of effectiveness of the activity was felt when asked Viva questions after demonstration.

Challenges:

The students are not aware of Bluetooth hardware. During the theory class, some of the students are not interested to listen the class. So, I have shown hardware demonstration of Bluetooth. After demonstrated, students realized the functions and concepts behind the technology.

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	1	1	1	-	-	1	1	-	1	-	-

CO1: The students will be able to analyze different standards used for Wireless LAN.
