

RAMCO INSTITUTE OF TECHNOLOGY
Department of Electronics and Communication Engineering
Academic Year: 2020 – 2021 (Odd Semester)

INNOVATIVE PRACTICE – Unit IV

Degree, Semester & Branch: VII Semester B.E. ECE A

Course Code & Title: EC8702 Adhoc and wireless Sensor Networks

Name of the Faculty member: Mr.K.Ragavan

ACTIVITY

Topic: Security Attacks in WSN

Learning Outcome:

- The students will be able to list the various security attacks in Wireless Sensor Networks

Activity Chosen: One-minute paper

Justification:

The concept related to attacks in WSN is important. In order to make the students more attentive one-minute paper activity was planned.

Time Allotted for the Activity: 3 Minutes

Details of the Implementation:

- The students were asked to take a paper and pen.
- They were asked write the types of security attacks in wireless sensor networks.
- The classes were in the online mode they were asked to scan and submit the paper through LMS or email for getting attendance of that class.
- After completing the task, students uploaded the one-minute paper.

Assessment of Effectiveness/Success of the Activity:

- ✓ The assessment of effectiveness of the activity was felt based on the performance of internal Assessment Test 3 (Part A -1 Question and Part B 7a.) related to security attacks.

Reflective Critique:

Benefits of conducting this activity:

- The activity helped to know the involvement of the students in listening to the online class.
- It helps to avoid unwanted distractions during the online class, since the activity is time bounded.

Challenges:

- Recapping the concept in the online class was a challenging task.

Various attacks:

Physical layer attack:

Jamming
temporing

Passive attack:

eaves-dropping

Transport layer

flooding attack

Routing

Blackhole attack.

Active attack:

Insertion deletion
(or) replying of
Packets.

J. Jeevitha
953617106032

Various Attacks:

Transport Layer:

flooding attack.

Routing:

Blackhole attack.

Physical Layer attack:

* Jamming
* Temporing.

Passive attack:

eaves - dropping

Active attack:

* Insertion
* deletion (or)
* replying of packets

953617106007
R. Amaraathi

Various Attacks:

Active attacks:

* Insertion, deletion (or)

replying of packets.

Passive attacks:

* eaves dropping.

Physical layer attack

* Jamming
* temporing.

Routing

* Black hole attack.

953617106030

R. Leon Mohit Ranga

Transport Layer:

* flooding attacks.

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO3	3	2	1	-	-	1	1	3	-	2	-	1

CO4: The students will be able to describe the transport layer and security issues possible in wireless sensor networks.
