

RAMCO INSTITUTE OF TECHNOLOGY

RAJAPALAYAM

Department of Artificial Intelligence and Data Science

Academic Year: 2025- 2026 (Odd Semester)

Active Learning Best practices: Flipped Classroom-Cooperative Learning
Technique

Degree, Semester & Branch: VII Sem. B.Tech. Artificial Intelligence and Data Science

Course Code & Title: - GE3755 & Knowledge Management

Name of the Faculty member: Ms.V. Logapriya/Assistant Professor-AI & DS

Theme of discussion: Knowledge Sharing behaviour on the Listserv and during meetings.

Topics Covered: Unit II

Date and Time: 22.08.2025 & 9.45 A.M to 10.30 A.M

Course Outcome: CO2

- Topic Learning Outcome: TLO16
- Activity Chosen: Flipped Classroom

Active Learning Best practices: Flipped Classroom

Topic: Knowledge Sharing behaviour on the Listserv and during meetings.

Learning Outcomes

- **Critical Thinking:**
Students will critically analyze the advantages, limitations, and real-world applications of asynchronous (Listserv) and synchronous (meetings) knowledge sharing.
- **Communication Skills:**
Students will demonstrate structured oral and written communication by engaging in presentations, role-play simulations, and peer-to-peer questioning.
- **Collaboration and Teamwork:**
Students will practice cooperative learning through group-based problem-solving, simulation of workplace scenarios, and the creation of a joint comparative framework.
- **Knowledge Application:**
Students will relate theoretical concepts of knowledge sharing to practical academic and organizational situations, thereby strengthening application-oriented understanding.

Procedure

Pre-Class Preparation (Flipped Content)

- Faculty shares pre-recorded lecture material (short videos, reading notes, or slides).
- Content covers:
 - Fundamentals of Listserv and its role in asynchronous communication.
 - Characteristics of meetings as synchronous platforms for knowledge exchange.
 - Comparative perspectives: advantages, challenges, and applications.
- Students are instructed to:
 1. Review materials and note at least **two unique advantages** and **one limitation** for each method.
 2. Reflect on a real-life example where they have observed or could apply either Listserv or meetings in academic/professional contexts.

Introduction (5 minutes)

- **Purpose:** The faculty introduces the session objective – to contrast and evaluate knowledge sharing behaviours in Listserv-based digital platforms and real-time meetings.
- **Instructions:** Briefly define asynchronous vs synchronous knowledge sharing *and contextualize* their importance in knowledge management.
- **Setup:** Seating arranged in collaborative clusters to promote peer-to-peer engagement.

Preparation Phase (10 minutes)

- **Grouping:** Class divided into four groups, each tasked with analyzing a specific dimension:
 - *Group 1:* Advantages of knowledge sharing on the Listserv.
 - *Group 2:* Challenges of Listserv knowledge sharing.
 - *Group 3:* Advantages of knowledge sharing during meetings.
 - *Group 4:* Challenges of knowledge sharing during meetings.
- **Task:** Groups prepare short 3–4 minute presentations supported with examples from academia, research collaborations, or organizational contexts.
- **Guidelines:** Encourage evidence-based reasoning, ensure equal participation, and emphasize clarity and professionalism.

Discussion & Simulation Phase (15 minutes)

- **Presentations:** Each group presents its findings.

- **Simulation Activity:**
 - A student enacts a *Listserv post* (formal written note distributed to peers).
 - Another group enacts a *mini-meeting* (face-to-face discussion on the same topic).
- **Comparative Analysis:** Faculty moderates discussion by highlighting:
 - Nature of communication (written vs verbal).
 - Permanence of knowledge (archived vs temporary).
 - Inclusivity and participation styles.
- **Audience Engagement:** Non-presenting groups ask clarifying questions, suggest counterpoints, or add missing insights.

Group Reflection & Synthesis (10 minutes)

- **Discussion Points:**
 - Situational suitability of Listserv vs meetings.
 - How organizational culture influences knowledge sharing choice.
 - Strategies for integrating both methods effectively.
- **Collaborative Task:** Groups co-create a comparative chart titled “Best Practices for Knowledge Sharing: Listserv vs Meetings.”
 - Dimensions include: speed, accessibility, inclusivity, record-keeping, participation style, and communication richness.

Wrap-Up (5 minutes)

- **Summary:** Faculty consolidates learning points, emphasizing that effective knowledge sharing requires selecting the right medium based on purpose and context.
- **Reflection:** Students individually articulate one scenario where they would choose Listserv, and one scenario where they would choose meetings.

Glimpses

Reflective Report

Challenges & Strategies

- *Challenge:* Limited prior exposure to Listserv as a communication tool.
 - *Strategy:* Pre-session video demonstration and simplified examples.
- *Challenge:* Risk of uneven participation in group work.
 - *Strategy:* Assign specific roles (leader, note-taker, presenter, moderator) to ensure accountability.
- *Challenge:* Time constraints for discussion and role-play.
 - *Strategy:* Strict time management and faculty facilitation to maintain flow.

Observations

- Students demonstrated clear understanding of **asynchronous vs synchronous knowledge sharing**.
- Role-play significantly enhanced engagement and provided a **practical dimension** to theoretical concepts.
- Comparative analysis fostered analytical thinking and collaboration across groups.
- Active learning reinforced not just content mastery but also **soft skills like teamwork and communication**.

Student Response (Expected)

- **Engaged Learners:** Active contributions in presentations and role-play activities.
- **Assisted Learners:** Better clarity in differentiating communication modes through peer learning.
- **Overall Enjoyment:** Students appreciated the interactive structure and its relevance to real-world academic and workplace scenarios.

FEEDBACK

Active Learning Best practices: Flipped Classroom -Cooperative Learning Technique

Degree, Semester & Branch: VII Sem. B.Tech. Artificial Intelligence and Data Science

Course Code & Title: - GE3755 & Knowledge Management

Name of the Faculty member: Ms.V. Logapriya/Assistant Professor-AI & DS

Theme of discussion: Knowledge Sharing behaviour on the Listserv and during meetings.

Topics Covered: Unit II

Date and Time: 22.08.2025 & 9.45 A.M to 10.30 A.M

Feedback collected in class and also through online

Gform Link : <https://forms.gle/Gejx1kf3WQS7CyUf6>

Feedback Questions:

1. Did the active learning method used in the session engage your interest in the topic? Yes No

2. How did the active learning method enhance your understanding of the topic?

Excellent Good Satisfactory

3. Did the active learning method encourage active participation and communication?

Yes No

4. Did the active learning method prompt you to think more deeply or critically about the topic?

Yes No

Feedback Analysis:

1. Did the active learning method used in the session engage your interest in the topic?

31 responses

● Yes
● No

2. How did the active learning method enhance your understanding of the topic?

31 responses

● Excellent
● Good
● Satisfactory

3. Did the active learning method encourage active participation and communication?

32 responses

● Yes
● No

4. Did the active learning method prompt you to think more deeply or critically about the topic?

32 responses

● Yes
● No
