

Department of Artificial Intelligence and Data Science

Academic Year 2025 – 2026 (Odd Semester)

Degree, Semester & Branch: B.Tech , III & Artificial Intelligence and Data Science ‘A’

Course Code & Title: AD3351 & Design and Analysis of Algorithms

Name of the Faculty member (s): B. Revathi

Active Learning Practice Description

❖ Unit / Topic: Unit -3 / Multistage Graph

❖ Course Outcome: CO 3

❖ Unit Outcome: 3e

❖ Activity Chosen: Think, Pair & Share

Schematic Diagram of the Multistage Graph

➤ Justification:

- ❖ Think Pair & Share is a method that allows students to engage in individual and small- group thinking before they are asked to answer questions in front of the whole class. There are four steps to this method.
- ❖ **Step 1(5 minutes)**
Groups of students listen to a question posed by the teacher.
- ❖ **Step 2: (10 minutes)**
Individual students are given time to think and then write their responses.
- ❖ **Step 3: (20 minutes)**
Pairs of students read and discuss their responses.
- ❖ **Step 4: (15 minutes)**
A few students are called on by the teacher to share their thoughts and ideas with the whole class.

➤ Time Allotted for the Activity: 50 minutes

• Details of the Implementation:

- Think-Pair-Share (Cooperating learning) innovative practice conducted for II AI & DS ‘A’ students, after explanation of the concept of Multistage Graph.
- **Think:** The students to think about Multistage graph concepts.

- **Pair:** Make them as a pair or group and share the concepts of Dynamic Programming-Multistage Graph with their team members.
- **Share:** Finally, one student from each group to explain the concept to whole class for further discussion. Mr. Mohamed Ibrahim, Ms. Archana, II AI & DS 'A' shared their ideas and knowledge of how the graph flow from one to another node and involved in dynamic programming to all students.

- **Images / Screenshot of the practice:**

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

The students felt that this activity is very useful.

- ❖ **Benefit of the practice** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

The students can get more clarity in the particular topic by discussing and sharing their views with the other students in the class.

- ❖ **Challenges faced in implementation:**

Only one person selected from each group to share their answers in front of the class.

(Odd Semester)

FEEDBACK Active Learning Best practices: Think Pair Share

Degree, Semester & Branch: B.Tech, IV & AI / DS

Course Code & Title: AD3351&Design and Analysis of Algorithms

Name of the Faculty member: Mrs.B.Revathi, AP/AD

Theme of discussion : Multi stage Graph

Date and Time : 10.09.2025 & 11.35 am to 12.20 pm.

Feedback collected in class and also through online

Feedback Analysis:

1. Can you able to understand Dynamic & Greedy concepts?

57 responses

● Yes
● No
● Maybe

3. Can you able to explain the apply the concepts of Dynamic Programming?

37 responses

● Yes
● No
● Maybe

2. can you able to explore the concepts of Multi Stage Graph?

57 responses

● Yes
● No
● Maybe

4. Can you able to describe the concepts of Multistage Graph?

58 responses

● Yes
● No
● Maybe
