

Department of Artificial Intelligence and Data Science

Academic Year 2025 – 2026 (Odd Semester)

Degree, Semester & Branch: B.Tech , III & Artificial Intelligence and Data Science 'B'

Course Code & Title: AL3391 & Artificial Intelligence

Name of the Faculty member (s): Dr.S.V.Anandhi

Innovative Practice Description

❖ Unit / Topic: Unit III /Concepts in Alpha Beta Pruning

❖ Course Outcome: CO3

❖ Topic Learning Outcome: TLO 6,7

❖ Activity Chosen: Think, Pair & Share

Schematic Diagram of the Alpha Beta Pruning

➤ **Justification:**

- ❖ Think Pair & Share is a method that allows students to engage in individual and small- group thinking before they are asked to answer questions in front of the whole class. There are four steps to this method.
- ❖ **Step 1(5 minutes)**
Groups of students listen to a question posed by the teacher.
- ❖ **Step 2: (10 minutes)**
Individual students are given time to think and then write their responses.
- ❖ **Step 3: (20 minutes)**
Pairs of students read and discuss their responses.
- ❖ **Step 4: (15 minutes)**
A few students are called on, by the teacher to share their thoughts and ideas with the whole class.

➤ **Time Allotted for the Activity:** 50 minutes

• **Details of the Implementation:**

- Think-Pair-Share (Cooperating learning) innovative practice conducted for II AI &

DS 'B' students, after explanation of the concept of Multistage Graph.

- **Think:** The students to think about Alpha Beta pruning concepts.
- **Pair:** Make them as a pair or group and share the concepts of Alpha Beta pruning with their team members.
- **Share:** Finally, one student from each group to explain the concept to whole class for further discussion. Mr.M.Aswin, Mr. A.Vasanthavel, II AI & DS 'B' shared their ideas and knowledge of how the Alpha beta pruning done from one level to another and involved in dynamic programming to all students.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO11	PSO1
CO3	3	3	2	3

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO11	PSO1
Justification for correlation	Apply theory and principles of alpha beta pruning Techniques to solve an engineering problem.	Identify algorithms of the statistical concepts applied to solve a complex problem.	Identify the technological advance in artificial intelligence that required practitioners to seek education in order to stay current trends in AI through continuous learning and research	Apply search algorithms to solve real world problems.

• **Images / Screenshot of the practice:**

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

The students felt that this activity is very useful.

1. Did you able to understand Alpha Beta Pruning concepts?

11/08/2021

2. Can you able to explore the concepts of Alpha Beta Pruning?

11/08/2021

3. Can you able to explain the concepts of Alpha Beta Pruning?

11/08/2021

4. Can you able to describe the concepts of Alpha Beta Pruning?

11/08/2021

- ❖ **Benefit of the practice** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

The students can get more clarity in the particular topic by discussing and sharing their views with the other students in the class.

- ❖ **Challenges faced in implementation:**

Only one person selected from each group to share their answers in front of the class.
