

Department of Civil Engineering

Academic Year 2022-2023 (Odd Semester)

Degree, Semester & Branch: V semester B.E. EEE

Course Code & Title: OCE551 & Air Pollution and Control Engineering

Name of the Faculty member (s): Mr.V.Ragavan

Innovative Practice Description

Unit / Topic: Unit I / Classification of Air Pollutant and their effect

- Course Outcome: CO1
- Topic Learning Outcome: TLO2, TLO3
- Activity Chosen: Four Corner Four Question
- Justification:

Classification of Air Pollutant and their effects on human and property is a topic that involves the understand the source and characteristics of air pollution and identifies the impact of air pollution on human, vegetation, animals and properties. For that, I want to assess the understanding level of the students that's why I have chosen one minute paper for the above topic.

- Time Allotted for the Activity: 3 minutes

- Details of the Implementation:

- The one minute paper is a very commonly used classroom assessment technique. It really does take about a minute and, while usually used at the end of class, it can be used at the end of any topic discussion.
- I asked all students to take a piece of paper and made them to write answers for the questions within one minute.

- CO – PO / PSO mapping:

CO	PO1
CO1	3

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:

Innovative practice	PO1
Justification for correlation	Understand the source and characteristics of air pollution and identifies the impact of air pollution on human, vegetation, animals and properties, students will be able to aware the impact and give solution to area which is affected by pollutant.

Subject: <u>Env. & Geog.</u> Subject Name: <u>Air Pollution and control Engineering</u> Unit 1: <u>Introduction</u> Intermediate Training Institute - <u>Feroz</u> Day No: <u>22/05/2022</u> Name: <u>A. K. Singh</u> Roll No: <u>2022-2222</u>	<u>Definition of Air Pollution</u> → <u>Decrease in the quality of atmosphere</u> → <u>Superfluous growth of</u> → <u>contaminating and</u> → <u>degrading the</u> → <u>atmosphere</u>
<u>Factors and sources of air pollution</u> → <u>Primary sources</u> → <u>Secondary sources</u> → <u>Industrial</u> → <u>Domestic</u> → <u>Transportation</u>	<u>It is one of the types of air pollution</u> → <u>Based on origin</u> → <u>Based on the nature of the pollutant</u> → <u>Based on the frequency of occurrence</u>

❖ **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

The students felt easy to remember and recollect the concepts involved in the given topic which will make them to attend the questions under this topic in Internal Assessment Test.

❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- i. Four Corner Four Question activities are an effective way of involving all students in class simultaneously.
- ii. It prompts students to reflect on the day's lesson and provides the instructor with useful feedback.

❖ **Challenges faced in implementation:**

Initially, I have planned the activity for 3 minute but students have taken 5 minutes to write the answers.
