

Department of Computer Science and Business Systems

Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch : VI Semester B.Tech CSBS

Course Code & Title : CCD334 Supply Chain Management

Name of the Faculty member : Dr.S.Erana Veerappa Dinesh, ASP / CSBS

Innovative Practice Description

- **Unit / Topic:** Unit I / Decision Phases in Supply Chain
- **Course Outcome:** CO1
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - In one-minute paper activity the students will be given 60 seconds to write the brief about that class session.
 - Decision phases in supply chain management are essential for the efficient functioning and long-term success of any organization. In a supply chain, decisions are made at various levels - strategic, tactical, and operational - each with a different time horizon and impact on the system. These phases help organizations structure their planning and execution activities in a logical and manageable way. Without clearly defined decision phases, companies may face issues such as poor coordination, increased costs, and missed opportunities. By breaking down decisions into phases, supply chain managers can ensure that long-term goals align with short-term actions, enabling responsiveness to market changes while maintaining overall strategic direction.
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
 - Faculty explained the concept of the decision phases in supply chain.
 - Students were asked to write the summary of different types in decision phases of supply chain in a paper within a minute as shown in fig 1.
 - The faculty member collected and corrected the sheet as shown in fig 2. The students who have written wrong definitions were asked to rewrite it.
- **CO – PO / PSO mapping (specific to this activity):**

CO	PO1	PO2	PO9	PO10	PSO1
CO2	3	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO9	PO10	PSO1
Justification for correlation	Students will be able to understand and recall key decision-making phases (strategic, tactical, and operational) within supply chain management.	Learners will develop the ability to apply these decision frameworks to optimize supply chain processes in real-world scenarios.	Individual or group involvement in case-based activities will enhance teamwork, responsibility, and decision-making skills.	Students' communication and documentation skills will improve as they present their findings clearly and professionally.	Students will develop the capacity to make supply chain decisions that align with organizational strategy and efficiency goals.

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students said that they were able to recollect and remember the decision phases in supply chain and its concepts after the activity
- Students felt it will be helpful while preparing for exam

❖ ***Benefit of the practice:***

- Students remembrance of the concept is improved
- Get a sense of what the students have learned, where there might be gaps in their knowledge

❖ ***Challenges faced in implementation:***

- Few students made a mistake in writing the procedure.
- It took much time for some students to complete the activity
