

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Business Systems
Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch: VII Semester B.Tech CSBS

Course Code & Title: CCD334 Supply Chain Management

Name of the Faculty member (s): Dr.S.Erana Veerappa Dinesh, ASP/CSBS

Innovative Practice Description

Unit /Topic: Unit 5 / The Role of IT in Supply Chain

Course Outcome: CO5

Topic Learning Outcome: TLO11

Activity Chosen: Learning by Teaching

Justification:

"Learning by teaching" is an instructional strategy where learners deepen their understanding by preparing to teach others. This method promotes active engagement, requiring individuals to clarify concepts, organize knowledge, and anticipate questions, which enhances comprehension and retention. Teaching also fosters critical thinking, as learners must simplify complex ideas and recognize their own knowledge gaps. In the process, they develop communication skills, confidence, and a sense of responsibility. This approach is particularly effective in collaborative settings and subjects that demand analytical reasoning, such as science, mathematics, and technology. By turning learners into teachers, the strategy reinforces subject mastery and supports cognitive development.

Time Allotted for the Activity: 35 minutes

Details of the Implementation:

- The students were intimated about this event and one week in prior to the session, the instructor asked the students about willingness about teaching to the particular topic.
- Sanjanasri T has shown interest to take class.
- Student was assigned a topic of the Role of IT in Supply Chain.
- Student was given time to prepare their assigned topics. She was encouraged to gather information from various sources, organize the content effectively, and plan their teaching approach.
- During the session, students took turns presenting their assigned topics to their classmates. She utilized different teaching techniques such as solving problem, and interactive

activities to engage the class mates.

- After that, a question-and-answer session was held to encourage active participation and clarify any doubts. At the conclusion of the session, the faculty member summarized and consolidated the key points and information discussed, ensuring that all participants had a comprehensive understanding of the covered topics.

CO – PO / PSO mapping:

CO	PO1	PO3	PO4	PSO3
CO 5	3	3	3	3

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO3	PO4	PSO3
	3	3	3	3
Justification for correlation	The students apply foundational engineering and computing principles to analyze how IT enhances supply chain efficiency, visibility, and integration across processes.	Learners design IT-based solutions for real-world supply chain challenges such as inventory management, logistics tracking, and demand forecasting.	Students use research and data analytics tools to evaluate the effectiveness of IT solutions in supply chain optimization, enabling informed decision-making.	Students gain insights into real-time industry practices and apply management principles and ethical considerations when implementing IT in supply chain operations.

Screenshot of the practice:

Fig.1. Peer Discussion by the student Sanjanasri T

Reflective Critique:

Feedback of practice from students and other stakeholders:

- Most students felt that this event provided valuable practice in the role of it in supply chain.

Benefit of the practice:

- Students demonstrated the ability to explain the concepts clearly and without confusion.
- Their understanding of the concepts was evident from their responses to the questions asked during the discussion session.

Challenges faced in implementation:

- Students perceived the activity as time-consuming.
- Some students found the discussion challenging due to a lack of interest.
- Achieving equal participation from all students proved to be difficult.
