

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Business Systems

Academic Year 2024– 2025 (Odd/ ~~Even~~ Semester)

Degree, Semester & Branch: B.Tech, V & CSBS

Course Code & Title: CCS335 & Cloud Computing

Name of the Faculty member(s): Dr.M.Gomathy Nayagam

Innovative Practice Description

- **Unit/Topic: Unit I / Cloud Deployment Model and Service Model.**
- **Course Outcome: CO1**
- **Topic Learning Outcome: 1b**
- **Activity Chosen: Mind Map**
- **Justification:**
- Incorporating mind maps into a blended learning environment for teaching the Cloud Deployment and Cloud Service models helps to simplify complex relationships and structures. It enhances student engagement, promotes active and self-directed learning, supports diverse learning styles, and can be an effective tool for both instruction and assessment. By combining mind mapping with digital tools and interactive elements of blended learning, instructors can facilitate a more effective, engaging, and memorable learning experience for students exploring the intricacies of cloud computing.
- **Time Allotted for the Activity:15 Minutes**
- **Details of the Implementation:**
 - The concept of cloud deployment models and service models are explained by the course instructor for 30 minutes' time duration in the class
 - Course instructor allotted next 10 minutes for creating mind map/ concept map to the students based on the concept explained by the course instructor.
 - Students utilized the time period 10 minutes to create the mind map
 - Then, course instructor randomly choose students to show the mind map they drawn in the class room and explain about it for the next 5 minutes.
 - Fig shows the sample mind maps of the students Ms.M. Haritha, Ms.M.Banu and Ms.V.Kousalya.

• **CO–PO/ PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO 1	3	3	3	2	1	-	-	-	1	1	1	1	3	-	3

(1– Low 2–Moderate 3 – High)

• **PO/ PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO5
	3	3	3	2	1
Justification for correlation	The students could be able to apply the basic engineering knowledge to use the various cloud deployment models and service models.	The students could be able to use the cloud deployment model and service model to solve the various issues of real time application.	The students could be able to provide the solution for identifying the relationship between the various cloud service models and deployment model	The students could be able to identify for which cloud model and service model is suitable to solve complex problems.	The students can be able to use AWS/GCP/ Alibaba Cloud platform for the various service model and deployment model.

Innovative practice	PO9	PO10	PO11	PO12	PSO1	PSO3
	1	1	1	1	3	3
Justification for correlation	The students can be able to use SAAS or PAAS or IAAS individually.	The students could be able to discuss with their peer members regarding the various service model/ deployment .	The students could be able to use the cloud service model to deploy their project	The students could be able to continuously learn about the service model of the cloud,	The students could be able to know the cloud service models and deployment models.	The students could be able to apply the knowledge of cloud service and deployment model to solve the industry related projects.

- **Images/Screen shot of the practice:**

Given in Annexure.

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- The majority of students appreciated the mind map blended learning approach, especially its ability to visually organize complex information and promote group collaboration. They felt it contributed to their overall understanding of the cloud computing models.

- ❖ ***Benefit of the Practice (E.g. Outcome Attainment would have increased due to innovative practice over conventional practice)***

- It helps students to know and recap all the service model and deployment model of cloud and they performed well about the concept during their internal assessment test.

- ❖ ***Challenges faced in implementation:***

- Make all students to participate for creating the mind map..
