

Department of Computer Science and Business System

Academic Year 2024 – 2025 (Odd Semester)

Degree, Semester & Branch: V Semester B.Tech CSBS

Course Code & Title: CCW332 & Digital Marketing

Name of the Faculty member (s): Mrs. M.Shabana Fathima, AP/CSBS

Innovative Practice Description

- **Unit / Topic:** Unit IV / Building Customer Relationship in Digital Marketing
- **Course Outcome:** CO4
- **Topic Learning Outcome/UO:** 4b
- **Activity Chosen:** Jigsaw
- **Justification:**

Building customer relationship is an important concept in digital marketing. Different way of achieving customer relationship were assigned to students under each group. Each student in groups was given a chance to excel themselves in a particular technique and share that knowledge with their team members. The main theme of this Jigsaw activity is to promote both individual and peer teaching which requires students to understand the concept very clearly and engage in discussion and learning.

- **Time Allotted for the Activity:** 30 Minutes
- **Details of the Implementation:**

Based on the students' academic performance and abilities, they were divided into 8 groups of 6 or 7 students in each group. It is called homegroup. Each student in a group is assigned list of each ways to achieve customer . I delivered the instructions to the students on how to creating personalized and engaging communication with customers. From each team one student is selected and framed as a team – “Expert Group”. 15 minutes were allotted to the teams to discuss the deep understanding of customer needs, preferences and behaviour. The expert group students were brought back into their home groups and allotted 15 minutes to explain the concept to other team members. Now each member in the team will be an expert in any one of building customer relationships techniques. They shared their ideas to all the other members in the group thus enabling each student to learn all the concept. This enabled the students to get insight knowledge in this topic.

- CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO2
CO1	3	2	1	2	2	2

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO2
	3	3	2	2	2	2
Justification for correlation	Requires basic engineering knowledge to understand the building relationship concept.	Able to Identify engineering problems with improving customer build techniques	Able to design solutions for complex engineering problems using building strong customer techniques.	Able to solve any customer relationship problems individually or in team and analysing customer data.	Able to explain the way to resolve leading to increased sale and revenue with their team members.	Able to apply customer retention and generate loyalty to provide solutions to real-world business problems

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Every student was actively participated and done the task and practice among their group members.
 - Each student explored the knowledge of strong building customer relationship concepts among the other students in the class.
 - It enables students to learn thoroughly about positive connection with customers.

- ❖ ***Benefit of the practice:***

- Students were actively participated in this activity.
 - From this activity, the students got clear idea about different ways of building customer relationship.

- ❖ ***Challenges faced in implementation:***

- It took some time and difficulties to organize the students into groups.
 - Some students in the team did not participate actively in the team.
