

Department of Computer Science and Business Systems

Academic Year 2024– 2025 (Odd Semester)

Degree, Semester & Branch: B.Tech – III Semester CSBS Course

Code & Title: CW3501 & Fundamentals of Management Name of

the Faculty member (s): M.Jeya Sundari, AP/CSBS

Innovative Practice Description

- **Unit / Topic:** Unit IV / LEADERSHIP POWER & AUTHORITY
- **Course Outcome:** CO4
- **Topic Learning Outcome:** TLO6
- **Activity Chosen:** Think Pair Share
- **Justification:**
 - **Think-Pair-Share** is an innovative teaching practice that encourages active engagement and critical thinking. For the topic **Leadership, Power, and Authority**.
 - **Think:** Students individually reflect on how leadership, power, and authority influence decision-making and organizational dynamics, fostering independent analysis.
 - **Pair:** They discuss their thoughts with a partner, enabling them to compare perspectives and deepen their understanding through dialogue.
 - **Share:** Pairs present their insights to the larger group, encouraging collaboration and collective learning.
 - This approach promotes critical thinking, peer learning, and a broader perspective on how leadership operates within structures of power and authority.
- **Time Allotted for the Activity:** 45 Minutes
- **Details of the Implementation:**
 1. **Preparation Phase:**
 - **Learning Objectives:** Define leadership, power, and authority, explain their interrelations, and apply these concepts in real-world scenarios.
 - **Materials Needed:** Presentation slides, handouts with definitions/examples, and discussion prompts.
 - **Class Setup:** Arrange seating to facilitate easy pairing and group sharing.

2. Execution Phase:

Step 1: Think (15 minutes)

- **Activity:** Pose a question such as:
"What are the key differences between power and authority, and how do leaders use them effectively?"
- Students individually reflect and write down their thoughts, ensuring they engage in critical thinking.

Step 2: Pair (10 minutes)

- **Activity:** Students are paired to discuss their individual responses.
- **Prompts for discussion:**
 - Share an example of a leader who uses power versus one who relies on authority.
 - Debate whether leadership can exist without formal authority.
- **Outcome:** Enhanced understanding through peer-to-peer learning.

Step 3: Share (15-20 minutes)

- **Activity:** Each pair shares their insights with the larger group.
- **Teacher's Role:**
 - Facilitate the discussion, highlighting key points and resolving misunderstandings.
 - Relate student responses to real-world applications (e.g., corporate leadership, political systems).

3. Follow-Up Phase:

- **Reflection Exercise:** Ask students to write a short paragraph summarizing what they learned about leadership, power, and authority.
- **Assessment:** Conduct a short quiz or group activity to evaluate their understanding of the concepts.

Benefits of This Approach:

1. **Active Participation:** Engages all students, ensuring they think critically and collaborate.
2. **Deeper Understanding:** Facilitates application of theoretical concepts to practical situations.
3. **Collaboration Skills:** Encourages teamwork and respect for diverse viewpoints.
4. **Confidence Building:** Students practice articulating their ideas in pairs before addressing the class.

This method ensures that abstract concepts like leadership, power, and authority are comprehensively understood and applied by students.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PO12	PSO1
CO4	3	1	1	1	1	1	1
(1 – Low 2 – Moderate 3 – High)							

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PO12	PSO1
Justification for correlation	It involves logical thinking and make the student able to act as a good leader	Students will be able to approach the problem by applying the types of various leadership and authority methods they learnt	Students will be able to provide solution for the problem using the different types of exceptions	As the student involved in the activity as team, the team work skill improved	Students communication skill will be improved as they are facing audience and communicating the activity	Exposure to various approaches in handling exceptions promotes adaptability and flexibility in problem-solving.	The problem solving skill earned through this activity helps the students in solving various problems

Images / Screenshot of the practice:

Fig 1: Students pair with neighbours and discuss answers

Fig 2: Student (Sravana Kumar) share the knowledge on built in exception to whole class

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- The students felt that this activity is so interesting and helps them to remember the concepts of Leadership
 - They said it will be very helpful when preparing for exams

- ❖ ***Benefit of the practice:***

- **Active Participation:** Engages all students, ensuring they think critically and collaborate.
 - **Deeper Understanding:** Facilitates application of theoretical concepts to practical situations(case studies).
 - **Collaboration Skills:** Encourages teamwork and respect for diverse viewpoints.
 - **Confidence Building:** Students practice articulating their ideas in pairs before addressing the class.

- ❖ ***Challenges faced in implementation:***

- All the students were unable to complete the task within allotted time
 - Few students found it difficult to solve the given questions individually. After discussion, they felt easy
 - Unable to complete the activity within planned time
