

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Business Systems

Academic Year 2024– 2025(Odd Semester)

Degree, Semester & Branch: B.Tech – I Semester CSBS

Course Code & Title: GE3151 & Problem solving and python programming

Name of the Faculty member (s): Mrs.B.Yazhini,AP/CSBS

Innovative Practice Description

Unit / Topic: Unit 5 / Errors and exceptions

Course Outcome: CO5

Topic Learning Outcome: TLO14

Activity Chosen: Learning by Teaching

Justification:

Error and Exception is an important topic in python programming. As students take on the role of teachers, they engage in discussions, answer questions, and share insights with their peers. This peer-to-peer interaction not only reinforces their own understanding but also allows for diverse perspectives and approaches to problem-solving, enriching the overall learning experience.

Time Allotted for the Activity: 35 minutes

Details of the Implementation:

- Before the class, the teacher, inquired about the students' interest in teaching the string and its methods few students expressed their interest.
- Based on their interest Pondharunkumar, Rokash were given topics on Error and Exception.
- The adequate time was given to the students to prepare for their teaching role so the topic was given a day before the class.
- Students presented their allocated topics to their classmates
- To keep the class interested, students utilized a variety of instructional strategies. Atheequr employed real-world examples to demonstrate the practical relevance of the concept. Dhanusri and Nithya explained about the types in exception with an coding example.
- To promote involvement, students were allowed to ask questions to their peers during

the presentation. Because of this, students were able to have conversations and share their perspectives about topic which very important in programming

CO – PO / PSO mapping:

CO	PO1	PO2	PO10	PSO3
CO 5	2	2	1	1

(1 – Low 2 – Moderate 3 High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO10	PSO3
	2	2	1	1
Justification for correlation	Students can able to apply basic knowledge of engineering in error and exception.	Students can able to develop the ability to identify engineering problems related to error and exception.	Students can able to communicate effectively based on the topic of error and exception	Students can be able to apply implement error and exception handling in projects to meet professional software standards and ensure user trust

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- All the students were eagerly listened the class. Students felt they are able to understand the topic.

- The students were able to remember key details and concepts more easily
- The students express that role of a teacher boost their confidence in knowledge of Error and Exception topic.
- Students highlighted that this practice helped them improve their communication skills, such as clarity, organization, and the ability to present complex ideas in a simplified manner.

❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Students actively engaging in teaching their peers gain a more profound understanding about the topic.
- Actively participating in the teaching process helps students remember key details and concepts better compared to passive learning methods
- This activity helped the student to improve communication skills.
- Students spent their time in self-learning.
- This activity encouraged the students to share their knowledge with others.

❖ ***Challenges faced in implementation:***

- Effectively motivate students who are not participating in the activity due to shyness, fear of public speaking, or lack of confidence. Motivate the students to overcome their shyness and engage in active learning.
- Implementing Learning by Teaching required additional time compared to traditional teaching methods. Planning and executing interactive teaching sessions was challenging.
