

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University

NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution

NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Business Systems

Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch: B.Tech. VI & CSBE

Course Code & Title: CCS372 & Virtualization

Name of the Faculty member (s): Mrs.M.Jeya Sundari, AP/CSBE

Innovative Practice Description

- **Unit / Topic:** Unit IV / Network Attached Storage
- **Course Outcome:** CO4
- **Topic Learning Outcome:** TLO4
- **Activity Chosen:** Think Pair Share
- **Justification:**

To effectively engage students in understanding **Network Attached Storage (NAS)**, the **Think-Pair-Share** strategy serves as a powerful innovative practice. This method promotes **active learning and peer interaction**, allowing students to individually reflect on key concepts of NAS such as file-level access, network connectivity, and shared storage. Then, by discussing their understanding with a partner, they can clarify doubts, reinforce learning, and develop better insights. Finally, sharing ideas with the larger group fosters collaborative learning, encourages diverse viewpoints, and solidifies their grasp of how NAS differs from other storage technologies like SAN. This method enhances **critical thinking, communication skills, and deeper conceptual understanding** in a structured yet student-centered environment.

Time Allotted for the Activity: 45 Minutes

• Details of the Implementation:

- **Think:** Pose a thought-provoking question on NAS and allow students a few minutes to reflect and jot down their individual responses.
- **Pair:** Ask students to pair up and discuss their understanding of NAS, comparing their answers and clarifying doubts.
- **Share:** Each pair shares their insights with the class, while the teacher summarizes and highlights important NAS concepts.

• CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO10	PSO1	PSO2
CO1	3	3	2	1	1	2	3	1

(1 – Low

2 – Moderate

3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1 3	PO2 3	PO4 1	PO9 1	PO10 1	PSO1 3	PSO2 1
Justification for correlation	Students apply foundational networking and virtualization knowledge during inquiry and exploration.	The real-world scenario prompts students to identify and analyze challenges in traditional networks.	Students explore open-ended questions and synthesize data from various sources during group inquiry.	Activity involves collaborative learning and effective team coordination.	Students present findings and explain concepts clearly during group presentations.	Students demonstrate understanding of network virtualization concepts and technologies relevant to their discipline.	The inquiry-based task reflects practical analysis and solution design related to modern networking environments.

- **Images / Screenshot of the practice:**

Reflective Critique:**❖ *Feedback of practice from students and other stakeholders:***

- All the students are very much interested to do the Inquiry-Based Learning approach for enhancing critical thinking, collaboration, and practical understanding of network virtualization concepts.

❖ *Benefit of the practice:* (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Outcome attainment has improved as Inquiry-Based Learning encourages deeper conceptual understanding, critical thinking, and active engagement compared to conventional lecture-based methods.

❖ *Challenges faced in implementation:*

- Some students initially struggled with open-ended questioning and self-directed learning.
- Time management was challenging as students needed more time to explore and present their findings.
