

Department of Computer Science and Business Systems

Academic Year 2024 - 2025 (Even Semester)

Degree, Semester & Branch: VI Semester B.Tech CSBS

Course Code & Title: CW3601 & Business Analytics

Name of the Faculty member (s): Mrs.M.Shabana Fathima , AP/CSBS

Innovative Practice Description

- **Unit / Topic:** Unit II/ Decision Making Process
- **Course Outcome:** CO2
- **Topic Learning Outcome/Uo:** 5
- **Activity Chosen:** Mind map
- **Date of implementation:**
- **Justification:**

In unit III, decision making process is an important topic that makes a business decision better. It has different methodologies and frameworks. This activity helps the students to recall the steps , methods and framework used in decision making process.
- **Time Allotted for the Activity:** 30 Minutes
- **Details of the Implementation:**
 - Instructor explained the topic decision making process in the previous class.
 - The time allotted for the topic is 30 Minutes.
 - The students were asked to understand the types of decisions and identify the objectives of the given problem to make the decision better using BI tools and technologies.
 - Next day asked the students to recall the concept and ask them to draw a mind map.
 - The students completed the activity, the sample of the activity as shown in Figure 1,2

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO8	PO9	PO10	PO12	PSO1	PSO2	PSO3
CO2	2	3	3	2	2	1	2	2	2	2	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO8	PO9	PO10	PO12	PSO1	PSO2	PSO3
	2	3	3	2	2	1	2	2	2	2	2
Justification for correlation	Application of knowledge in data analytics, AI, and BI tools to aid decision-making.	Identifying and analyzing business problems using BI techniques.	Developing analytical models and BI reports to support decision-making.	Using advanced BI methodologies to investigate business challenges and derive insights.	Ensuring ethical use of data and decision-making transparency in business intelligence.	Collaborating in teams to analyze business problems and develop BI-driven solutions.	Effectively presenting BI insights through reports, dashboards, and visualizations.	Effectively presenting BI insights through reports, dashboards, and visualizations.	AI/ML, Cloud, Cybersecurity, and IoT enhance BI decision-making.	Computational statistics and business intelligence improve problem-solving.	Ethical management and real-world projects contribute to practical applications.

Images / Screenshot of the practice:

Figure 1: Mindmap Discussion by student Kamatchi V ,Kousalya lakashmi M

Figure 2: Mind map Simplifications of Decision Making Process.

- **Reflective Critique:**
- ✦ **Feedback of practice from students and other stakeholders:**
 - Students reported that they could recall and retain the ideas of decision making process

- The students reported that the activity helped them remember everything that was covered in the previous class and that it enhanced their ability to learn on their own.
- It teaches students about the simplicity of decision making process.

Benefit of the practice:

- It enhances students problem-solving abilities and helps them remember the topics easily.
- The students can place their own views in the mind map

✚ ***Challenges faced in implementation:***

- Some students found it challenging to formulate mind map and several of the questions were hard to understand which method we have to use first.
- I thought there was a lack of clarity on the slow learners. I gave each student a distinct explanation, and after that, they understood perfectly.
