

Department of Computer Science and Business Systems
Academic Year 2023– 2024(Even Semester)

Degree, Semester & Branch: B.Tech – IV Semester CSBS

Course Code & Title: AL3451-Machine Learning

Name of the Faculty member (s): Mrs.B.Yazhini,AP/CSBS

Innovative Practice Description

- **Unit / Topic:** Unit I / Introduction and Motivation of Machine Learning
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO1
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - In one-minute paper activity the students will be given 60 seconds to write the brief about that class session.
 - Introduction and Motivation to machine learning is an important topic to know about the basic understanding of Machine learning concepts.
 - In order to have a recap the basic concepts this activity is chosen.
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
 - Faculty explained the concept of the machine learning techniques and types and also about the importance of Machine Learning.
 - Students were asked to write the summary of topic in a paper within a minute. Mr.Gopikaran and Ms.Haritha of II-CSBS answer sheets are shown in fig 1.
 - The faculty member collected and corrected the sheet. The students who have written wrong content were asked to rewrite it.
- **CO – PO / PSO mapping (specific to this activity):**

CO	PO1	PO2	PO3	PO4	PO5	PSO1
CO1	3	3	3	2	1	3

(1 – Low

2 – Moderate

3 – High)

- PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO4	PO5	PSO1
Justification for correlation	Students can be able to understand the Linear algebra mathematical concepts applied to solve complex problems.	Students will be able to apply the Vapnik Chervonenkis dimensions concept to different dimensional data points	Students will be able to design a model for predicting solutions for the real world problems	Students will apply research-based knowledge and methodologies to validate the effectiveness and performance of various Machine learning algorithms	Students will deploy the basic concepts of linear algebra and PAC learning	Students will be able to create a Machine Learning model with minimized bias, and variance error

- Images / Screenshot of the practice:

Fig 1: Sample One minute paper activity Written by Mr.Gopikaran and Ms.Haritha

Reflective Critique:

- ❖ **Feedback of practice from students and other stakeholders:**

- Students said that they were able to remember the techniques and concepts in machine learning after the activity

- Students felt it will be helpful while preparing for exam and useful to recollect the ideas regarding machine learning.

❖ ***Benefit of the practice:***

- Students remembrance of the concept is improved
- Get a sense of what the students have listen and learned, where there might be gaps in their knowledge

❖ ***Challenges faced in implementation:***

- Few students made a mistake in writing the concept.
- It took much time for some students to complete the activity.
