

Department of Computer Science and Engineering

Academic Year 2022 – 2023 (Even Semester)

Degree, Semester & Branch : IV Semester B.E CSE
Course Code & Title : CS3492 & Database Management Systems
Name of the Faculty member : Mr. K.Vignesh Saravanan, AP / CSE

Innovative Practice Description

- **Unit / Topic:** Unit I / Dynamic SQL & Revision of Unit-1
- **Course Outcome:** CO 1
- **Topic Learning Outcome:** TLO 1, 2, 3
- **Activity Chosen:** Reflection
- **Justification:**

Reflection is a process where teachers can identify their own teaching process and analyzing how their teaching (content delivery) might be improved for the better understanding of the students. The prime objective of Reflection is to make the students write their doubts in a paper on topics which they are not clear, so as the teacher can discuss and clarify the concepts that are not understood by the students.

- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**

After I completed the Unit-1, in order to address the doubts and to know the level of understanding of the students, they are insisted to honestly describe the concepts that they didn't understand well. I asked the students to write their doubts in SQL concepts.

The students wrote their doubts and topics which they are not clear as shown in Figure.1 (Samples of Asuthosh, Vaishnavi, Sathish, Harish, Anitharani). The papers are collected by me and I allotted 10 minutes time in the next hours and discussed all the doubts in next class session and make them understand. I also gave a few simple tasks in classroom to gain more understanding in the topics. The students felt they understood the concepts better.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO12	PSO3
CO1	3	3	3	1	3

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO9	PO10	PO12
	1	2	2

Justification for correlation	Student individuality in expressing their doubts	Written communication/ Asking questions are improved	Student will implement the questioning skill in future in written format

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- Students felt the activity conducted gave them a chance to represent their common doubts among students and could get additional clarification from me.

- ❖ ***Benefit of the practice:***

Through this activity the students can recollect the topics on Relational model, and relational algebra, Dynamic and static queries. The students are made to understand the concepts in which they are not clear and ensured that they understood the topics thoroughly.

- ❖ ***Challenges faced in implementation:***

- Students were not able to frame or express their doubts in English sentence properly and some questions were not clear to understand.
 - Slow learners were not interested to participate in this innovative teaching and submitted the empty paper.
 - Some of the students did not even ready to write their doubts
 - Students started to discuss and shout with their neighbors during the activity.
