

Department of Computer Science and Engineering

Academic Year 2021– 2022(Odd Semester)

Degree, Semester & Branch: III Semester B.E. ECE-‘B’ Section

Course Code & Title: EC8393 Fundamentals of Data Structures in C

Name of the Faculty member (s): Dr.V.Anusuya, Assoc.Prof/CSE

Innovative Practice Description

- **Unit / Topic:** Unit 1 / Strings- String operations- String Arrays.
- **Course Outcome:** The student will be able to develop the programs in C using basic constructs.
- **Topic Learning Outcome:** TLO3.
- **Activity Chosen:** One Minute Paper
- **Justification:**
 - In C string concepts such as declaration of string, initialization of string, string functions are difficult to understand. This activity makes the students to get a comprehensive knowledge in this String concept.
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**

At the end of the class, students were asked to write about the topic discussed in the class. The students expressed the understood content and the content which were not clear in that particular topic. The students also write about the specific topic which is needed to be discussed or clarified in the further classes as shown in Figure 1&2. This activity shows whether the students can able to understand the specific topic and their involvement the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PSO1
CO2	3	1	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PSO1
	2	1	1	1
Justification for correlation	The basic knowledge of engineering fundamentals is necessary to develop C	Basic C programming concepts using strings are used in analysis of complex	The student will be able to develop complex problems	The student can be able to apply C programming using string concepts in emerging trends in Information and Communication

	programs using strings	engineering problems	using C program with string concept	Technology
--	---------------------------	-------------------------	---	------------

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders***

- Students are spent in their own learning.
 - Students actively participate and respect is given to every member.
 - This activity encouraged the students to share their views.

- ❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- Slow learners easily understand the topics.
 - Students are spent in their own learning.
 - It increases class attendance and attentiveness and also improves the students' skill of writing and critical analysis of the topics.

- ***Challenges faced in implementation:***

- Some of the students are difficult to understand traversing a string using for loop.
 - The time of activity is planned is 10 minutes but it takes 15 minutes.
