

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019 - 2020 (Odd Semester)

Degree, Semester & Branch: VII Semester B.E. Computer Science and Engineering.

Course Code & Title: CS6703 Grid and Cloud Computing

Name of the Faculty member: M.Gomathy Nayagam, Asst.Professor (SG)/CSE

Innovative practice: Flash Cards

Type of Learning: Active Learning

Topic: Functional Requirements of OGSA/OGSI

Date: 29.07.2019

Learning Objectives:

Objective(s)	Statements
O1	Apply the knowledge to solve the large scale problem in grid computing.
O2	Students will able to improve their communication skills

Justification for the Topic:

In order to understand the lacking of standardization in Grid environment, the student must explore the knowledge of the various functional requirements of OGSA/OGSI. Once they understand the functionality requirement, they can able to provide a grid based solution to solve any complex scientific problems.

Use of Flash Cards:

- It helps the students to find the definition of one important concept.
- It motivates the students to identify the term associated with each definition and questions.
- It helps the students to use as a quick reference to revise the major functional requirements of OGSA/OGI.

Procedure of this Technical connection game:

- A flash card is a method in which the question and corresponding answer is in separate card.
- Question and answer of the card is prepared based on topic taught by the course instructor in the class on a particular day. The event is conducted at the end of the class hour on the same day.
- Answer cards will be distributed to students in the class.

- Once the question will be asked by one of the students in the class from the card, student members of group in the class should identify correct answer card within 2 minutes with their answer cards and explain the answer in front of the class for next 2 minutes.
- This will help the students to revise the particular topic on the day.

Activity:

- Questions and Answer cards were prepared in chart paper by the course instructor which is shown in fig.4.
- The entire 12 question cards were given to one particular student (Mr.Ariyanayagam) shown in fig.1.
- The entire class divided into 4 groups with 13 students.
- Each group could have 3 answer cards.
- The answer cards were distributed to the group by the course instructor.
- Questioner asked the questions one by one in the class.
- Questioner gave 2 minutes time to each question for identifying the answer card to the group.
- The members of the group heard the question and found out the corresponding answer card which they were having based on the topic discussed in class on the day.
- Any one of the group found the answer card with them, one of the students from the group came to the stage and he/she explained the answer for the question within 2 minutes is shown in figure 2.and 3.

Fig 1: Student ask the Questions to the Class

Fig 2: Student form one group discuss the answer to the corresponding question

Fig 3: Student form another group discuss the answer to the corresponding question

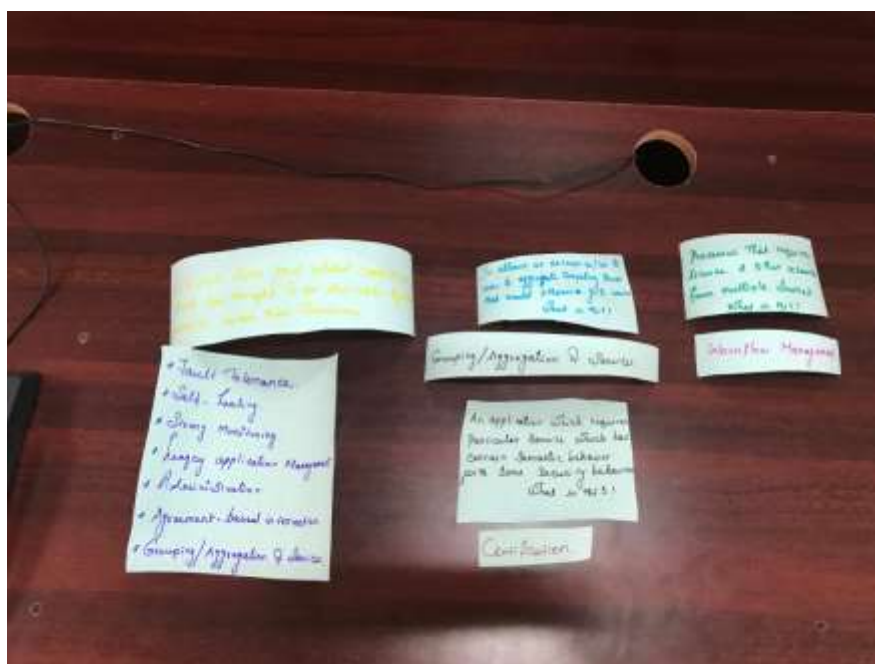

Fig 4: Sample Flash card

Outcome:

Students can able to provide standardized gird based solution to any complex scientific problems. This activity helped the students to know the various functional requirements of OGSA/OGSI.

Objective and PO Mapping

Objective(s)	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
O1	3	3		2	1							
O2	3	1		1			2	1	2	3		1

Reflective Critique:

Pre-implementation Reflection

- Even though the students didn't identify the correct answer, they answered first due to their curiosity.
- Clashes between the two groups will occur to deliver the answer for the question.

Steps taken for address the challenges:

- Course instructor explained the concepts once again and instructed the questioner to repeat the question once again clearly to make the students for clear understanding of question.

Post Implementation reflection:

- Most of the students were actively participated and enjoyed among their group members once they answered correctly.
- Students explored the knowledge of the various functional requirements of OGSA/OGSI. It helped the students to give grid based standardized solution to any complex scientific problems.
