

Department of Computer Science and Engineering Academic Year 2022 - 2023 (Odd Semester)

Degree, Semester & Branch: III Semester B.E. ECE 'B'

Course Code & Title: CS3353 & C Programming and Data Structures

Name of the Faculty member (s): Mrs. G.Mareeswari, AP/CSE

Innovative Practice Description

- **Unit / Topic:** Unit I / Functions Declaration, Definition and Initialization
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO3
- **Activity Chosen:** Minute Paper
- **Justification:**

Function concept is an important topic in C programming. Mostly all the applications are developed using function concept in C Program. This activity makes the students to get a comprehensive knowledge in this concept.

- **Time Allotted for the Activity:** 15 Minutes
- **Details of the Implementation:**

At the end of the class, the students were asked to write about the function topic discussed in the class. The students expressed the understood concepts in the function topic and the content they need more clarification in that particular topic. The students also write about the specific topic which is needed to be discussed or clarified in the further classes. The points on function topic shared by the students through this activity are shown in the figure 1. This activity shows whether the students can able to understand the function topic and their involvement in the particular class.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO10	PSO1
CO1	3	1	1	1	2	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO4	PO10	PSO1
	2	1	1	1	2	1
Justification for correlation	Needs engineering and mathematical knowledge for Function concept	Basic C programming concepts are used in analysis of engineering problems	To design solutions for complex engineering problems using Function concepts	To provide complex problem solutions with relevant Function operations	Able to execute and present programs using Function Concepts	Able to apply Function concepts in emerging trends in Information Technology

• Images / Screenshot of the practice:

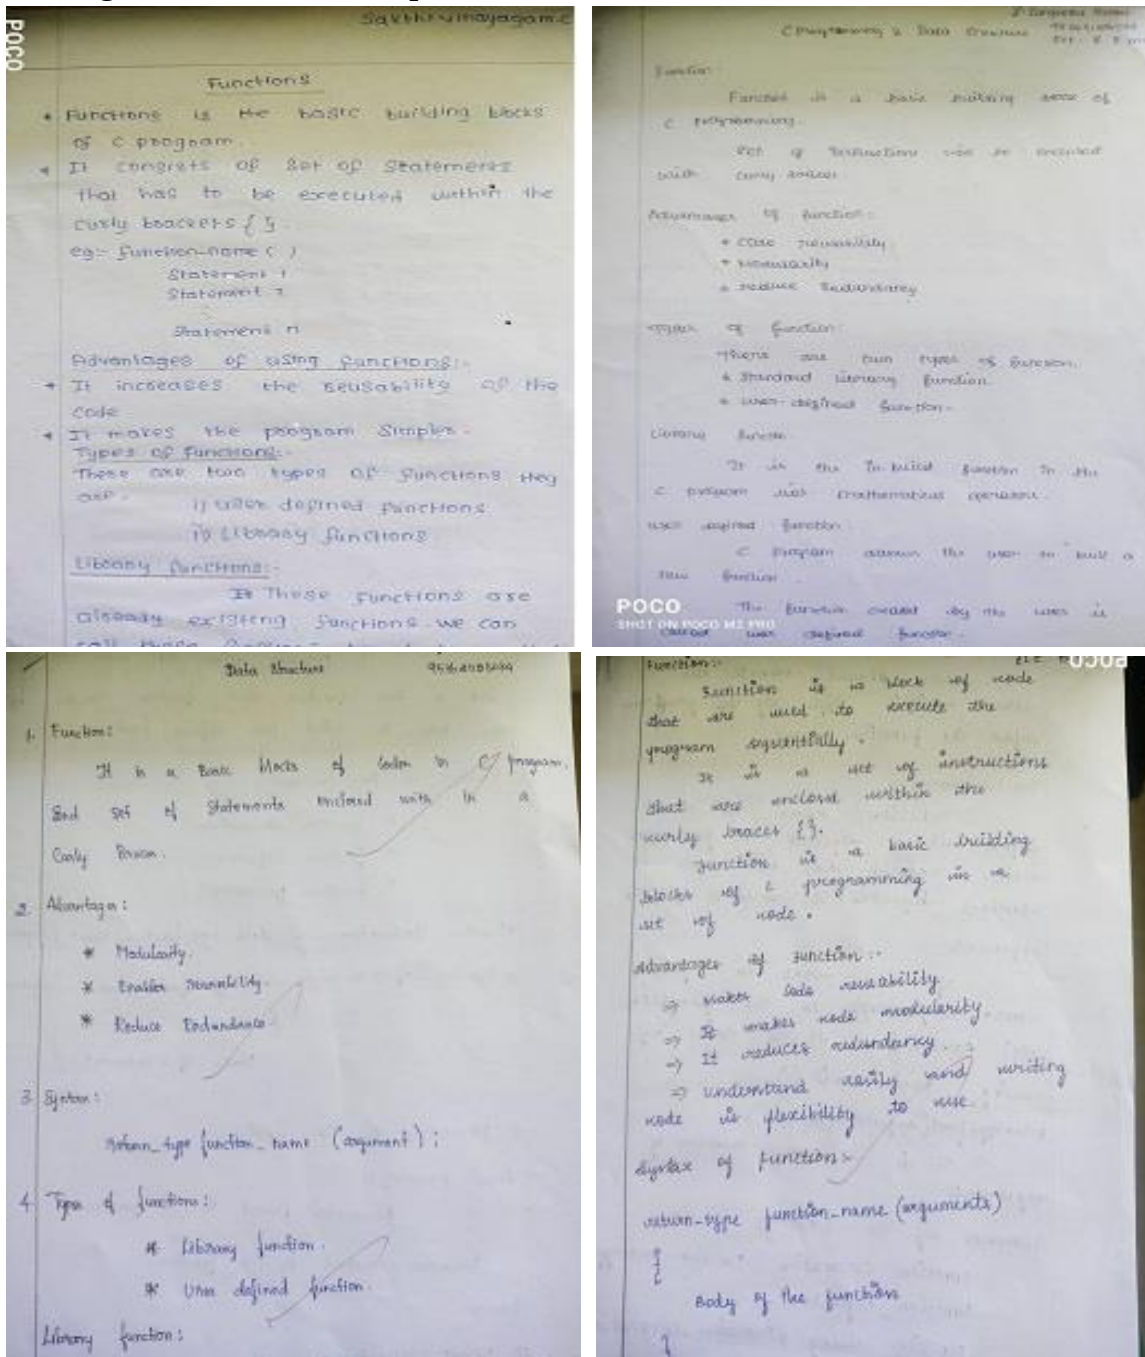

Figure 1: Minute Paper

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that they can able to understand the function topic clearly after conducting this activity.
- Also they can able to practice more programs on function concept.

❖ **Benefit of the practice:**

- Students were actively participated in this activity.
- From this activity, the muddiest parts in the concept were identified and the syntax and concepts of recursion functions were explained again in the next class for well understanding.

- Example programs were given and explained for their better understanding.
- Able to attend the programs using functions in Internal Test.

❖ ***Challenges faced in implementation:***

- Some students are hesitated and lack to share the concepts that they learnt in the class.
- Make the students to know the impact and importance of sharing their views and understanding related to the topic and made them involve in the activity.
