

Department of Computer Science and Engineering
Academic Year 2022 – 2023 (Odd Semester)

Degree, Semester & Branch: V Semester B.E CSE

Course Code & Title: CS8592 & Object Oriented Analysis and Design

Name of the Faculty member (s): Ms.G. Sakthi Priya, AP/CSE

Innovative Practice Description

- **Unit / Topic: Unit 1 / Case Study -the Next Gen POS system.**
- **Course Outcome: CO1**
- **Topic Learning Outcome: TLO2**
- **Activity Chosen: Problem Based Learning**
- **Justification:**
 - Problem Solving is a basic approach needed for developing any application.
Problem based learning improves the logical thinking.
 - The **Next Gen PoS application** is a computer application used to record sale and handle payment which can be used in any retail store.
 - Problem based learning on real time application such as Next Gen PoS system can helps the students to think beyond book
- **Time Allotted for the Activity: 10 Minutes**
- **Details of the Implementation:**
 - Faculty gave a brief explanation about Next Gen PoS Application and asked the students to think about the steps involved in a particular **sale** of a store
 - The steps involved **from** “Customer arriving at checkout with item” **to** “Customer leaving the checkout with purchased goods” are asked to written in detail by forming a team of two members as shown in Fig 1.
 - Finally, a discussion is made on the given case study and then Main success scenario of the use case “Process sale” is derived.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO12	PSO1
CO1	1	3	2	2	1	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO12	PSO1
Justification for correlation	It involves thinking and make the students to visualize the real word scenario which could be converted into an application using engineering knowledge	The Process sale in retail store is analysed in detail.	The steps involved in process sale is written as Main Success Scenario after analyzing the problem	The problem based learning activity involves two members in a team which motivates the team work	The knowledge gained on formulating Main success scenario of Process sale helps the students to any real world problem	The students can develop a software after determining the flow of the activities of process sale

• **Images / Screenshot of the practice:**

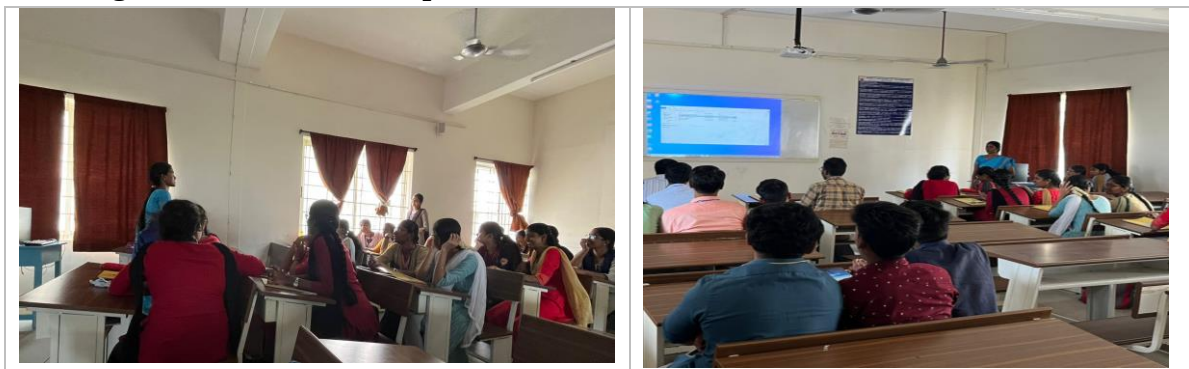

Fig 1: Glimpse of the activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that the problem based learning on real world problems are interesting than usual theory classes.
- They felt comfortable to ask doubts with their peers.

❖ **Benefit of the practice:**

- Peer to peer learning activity makes the students to get good wrapo.
- The students can share their gained knowledge
- Understanding and remembering of the topic help the students to solve real world problem

❖ ***Challenges faced in implementation:***

- As it involves oral communication, unable to test the writing capacity of the students
- Assessment on understanding is difficult
- It took more time than planned stipulated time.
