

Department of Computer Science and Engineering

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch : VI Semester B.E CSE
Course Code & Title : MX3085 Well-Being With Traditional Practices
Yoga, Ayurveda And Siddha

Name of the Faculty member(s): Mrs. S.Vijaya Amala Devi, AP / CSE

Innovative Practice Description

- **Unit / Topic:** Unit IV/ MENTAL WELLNESS/Stress Management
- **Course Outcome:** CO4
- **Topic Learning Outcome:** TLO16
- **Activity Chosen:** Jigsaw
- **Justification:**

Stress management is crucial for maintaining overall well-being and productivity, especially in educational settings where learners may experience pressure from academic demands, deadlines, and performance expectations. Justifying stress management initiatives in education is essential for fostering a supportive and conducive learning environment. The prime objective of JIGSAW is to promote both self and peer teaching which requires students to understand the concept very clearly and engage in discussion and learning.

- **Time Allotted for the Activity:** 45 Minutes
- **Details of the Implementation:**

- In a Jigsaw activity focused on stress management, students can be divided into 12 small groups, namely team1 to team12.
- Each group responsible for researching and becoming experts in a particular stress management technique or coping strategy, such as mindfulness, deep breathing, time management, or physical activity.
- They then collaborate to share their findings with other groups, fostering teamwork and collective problem-solving skills.
- These activities promote active learning by engaging students in research, discussion, and presentation of their findings.
- This active involvement enhances retention and understanding of stress management concepts and techniques.
- After they have used several techniques used for reducing stress, the expert group is collapsed and all the students are re-grouped into their original group (initial team). Now each member in the team will be an expert in any one techniques of stress management.
- They shared their ideas to all the other members in the group thus enabling each student to learn all the applications. This enabled the students to get insight knowledge in this topic.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO4	PO12	PSO1	PSO3
CO1	3	3	3	1	1	2	2

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO3	PO9	PO10	PO12
	2	1	2	2
Justification for correlation	Student will be able to design techniques for stress	Student will work individually and as a Team	Written communication/ and oral communication with team are improved	Student will implement the stress management techniques in future

• **Images / Screenshot of the practice:**

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students felt the activity is very interesting. Students felt the activity conducted gave them a chance to improve their communication skills, also working as a team they can face group discussions in future work place. Through learning from peer members, students felt comfortable to clarify their doubts.

❖ **Benefit of the practice:**

- Through this activity the students made to work as a team and explain to others also, like a group discussion activity. The students are made to understand the different the applications through knowledge sharing.

❖ **Challenges faced in implementation:**

- The grouping of the students was difficult, since some students were not present. Initially 7 teams were planned with team size of 7 members, but the team size is reduced and it was difficult to form the expert group.
- Some students in the team did not participate actively in the team.
- Individual assessment/observation was difficult.
