

Department of Computer Science and Engineering

Academic Year 2021– 2022(Odd Semester)

Degree, Semester & Branch: III Semester B.E. ECE-‘B’ Section

Course Code & Title: EC8393 Fundamentals of Data Structures in C

Name of the Faculty member (s): Dr.V.Anusuya, Assoc.Prof/CSE

Innovative Practice Description

- **Unit / Topic:** Unit 2 / Storage Classes
- **Course Outcome:** The student will be able to develop the programs in C using function, pointers, structures and unions.
- **Topic Learning Outcome:** TLO6.
- **Activity Chosen:** Cross word Puzzle
- **Justification:**
 - To identify the understanding level of a student in storage classes topic, a game based activity was chosen to do the revision of topic instead of carrying out regular quiz tests.
- **Time Allotted for the Activity:** 20 Minutes
- **Details of the Implementation:**

A crossword is an interesting word puzzle activity which helps the students to recollect the concept and try to find out the answer.

The activity was conducted in a classroom for duration of 20 minutes. The students were given with a crossword puzzle of 10 questions in a paper. They have to think and provide the answers in the given puzzle.

The students answered the questions as shown in figure 3 and 4. Sample questions and answers were shown in figure 1&2. The answers for the wrong questions were discussed immediately to make them to know the answer of all the questions.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PO10	PSO1
CO2	3	1	1	1	2	1

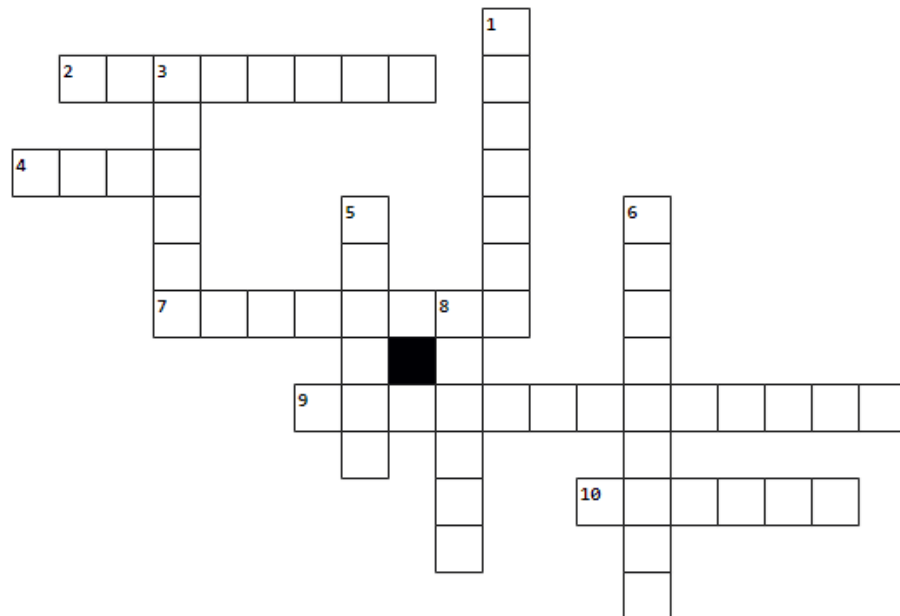

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO10	PSO1
	2	2	4	1
Justification for correlation	The basic knowledge of engineering	The basic of C programming concept is	The student will be able to	The student will be able to apply C programming concepts using

	fundamentals is necessary to understand the concept of storage class	necessary to incorporate storage class concept in C Programming	write C program using the concept of storage class	storage class in emerging trends in Information and Communication Technology
--	--	---	--	--

• **Images / Screenshot of the practice:**

Across	Down
2. A value stored in it can always access faster than one stored in memory.	1. Default value of both Automatic and Register storage classes
4. Default value of both Static and External storage class.	3. _____variable should be avoided to declare as a register variable.
7. Storage classes are used to define the scope and _____ of the variables.	5. The keyword which is used to declare external variable.
9. The storage place for Automatic , Static and External storage classes.	6. If a variable is declared inside a function without storage class specification, by default, it is an_____
10. _____variables are initialized only once, when the program is compiled.	8. A storage location in the computer.

• **Figure1: Questions on storage classes**

ANSWER KEY:-

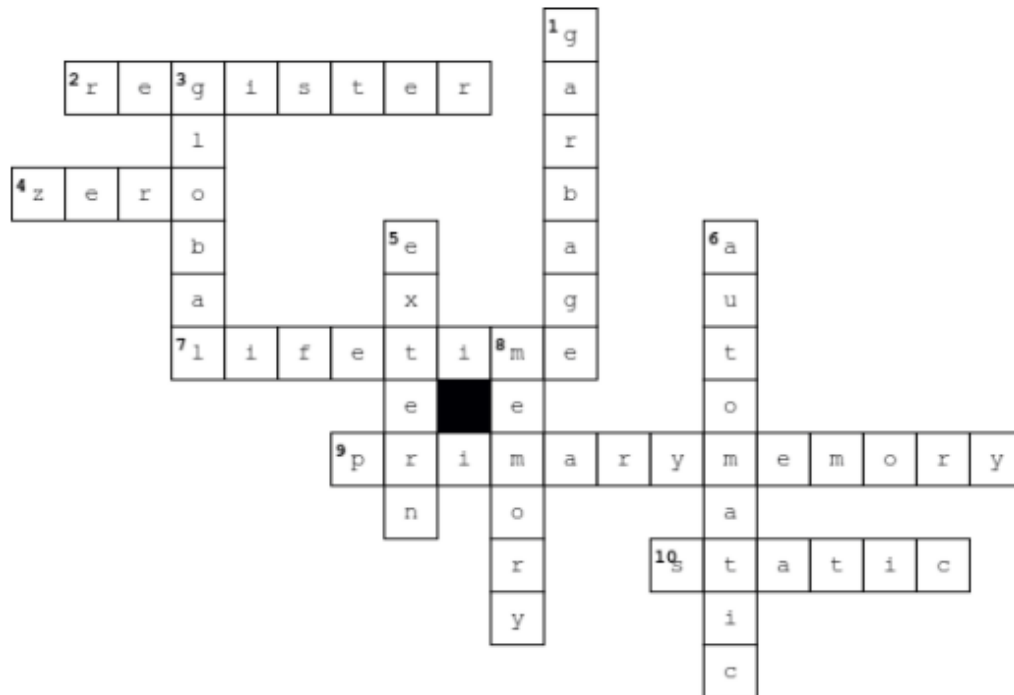

Figure2: Answers of storage classes

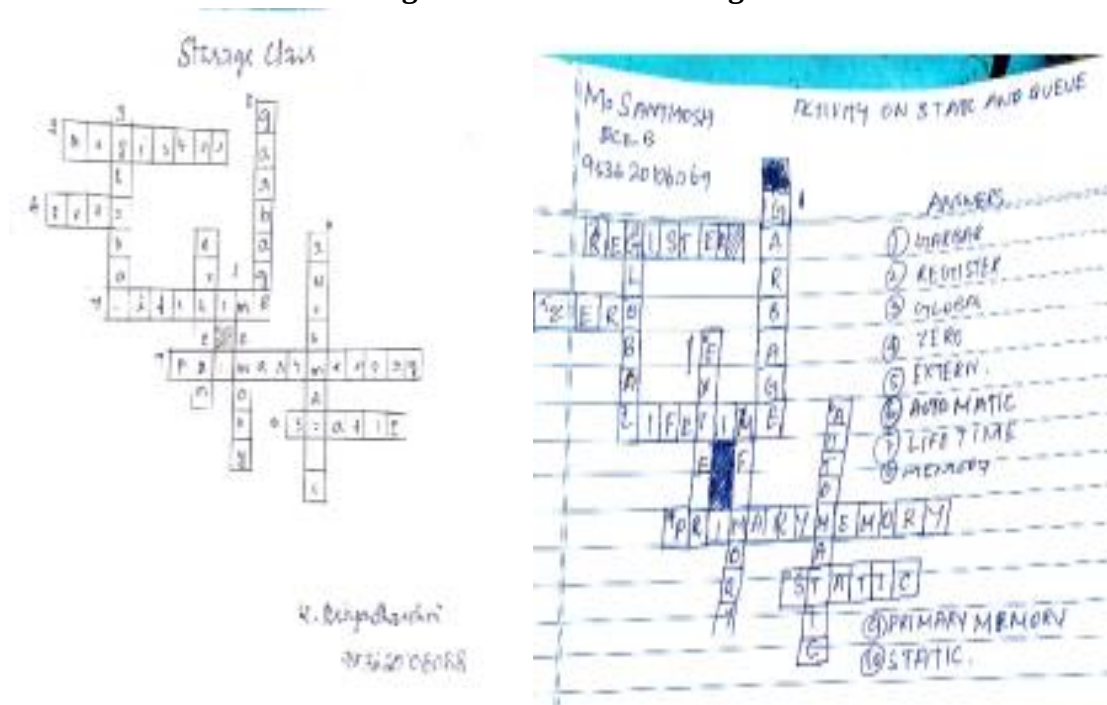

Figure 3. Sample Answers of students

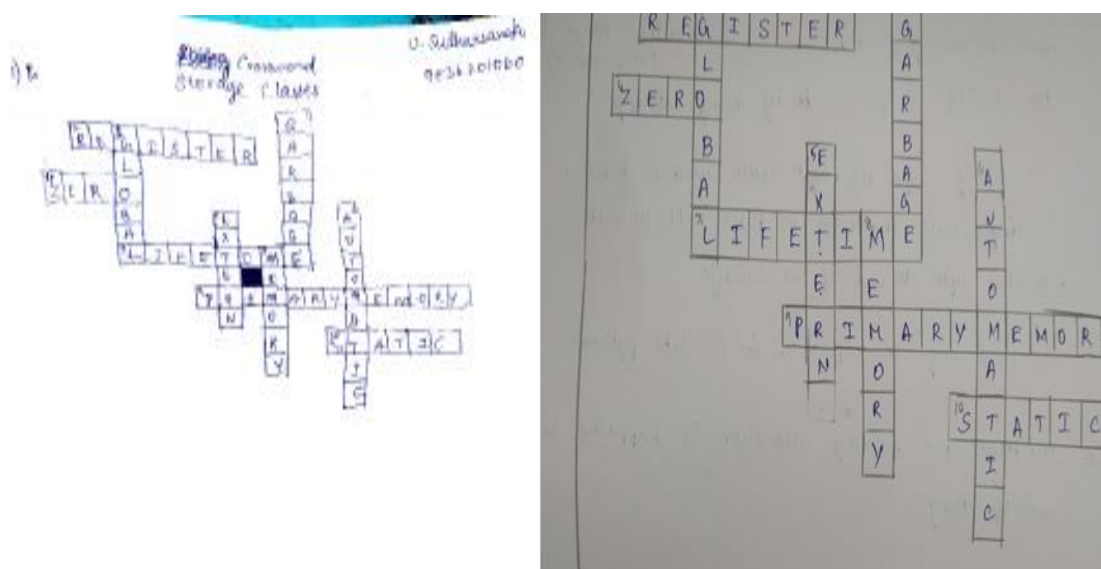

Figure 4. Sample Answers of students

- **Reflective Critique:**

- **Feedback of practice from students and other stakeholders:**

All the students are actively participated and enjoyed. The students are understood well about storage class concept and also how and where to use is also known well. They asked to conduct this type of activity in future.

- **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- From that we can find out that, most of the students had familiarity with the storage classes in C.
 - This activity helped the students to think and recall information and improve their problem solving skills.

- ❖ **Challenges faced in implementation:**

Some of the students couldn't able to recall the important terms and definitions while doing the activity.
