

Department of Computer Science and Engineering
Academic Year 2021– 2022(Even Semester)

Degree, Semester & Branch: B.E – II Semester CSE

Course Code & Title: CS3251 Programming in C

Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE

Innovative Practice Description

- **Unit / Topic: Unit I / Operators**
- **Course Outcome: CO1**
- **Topic Learning Outcome: TLO1**
- **Activity Chosen: Retrieval Practice**

• **Justification:**

Retrieval practice boosts learning by pulling information out. Operators is one of the important topics in C which helps in taking decision and to perform calculations. Make the students to retrieve the types of operators help them to remember it while writing programs and will also help them examine what they know.

- **Time Allotted for the Activity: 05 Minutes**

• **Details of the Implementation:**

- Faculty randomly asked two students to recall the concept of operators as shown in Fig 1.
- Student 1 recalled first five types of operator such as Arithmetic operator, Relational operator, Equality operator, Logical operator, Unary operator.
- Student 2 recalled the remaining types of operator such as Bitwise operator, Ternary operator, Size of operator, Comma operator
- The students were able to retrieve the operator symbols and able to identify the functionality of each operator.

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO2	3	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	It involves thinking and make the student able to choose appropriate operator for decision	Students will be able to identify the suitable operators for solving	Students will be able provide solution by using operators	As the student involved in the activity as team of two, the team work skill improved	Students communication skill will be improved as they are facing audience	The recollecting skill earned through this activity helps the students in solving

	making	a problem				various problems
--	--------	-----------	--	--	--	---------------------

- **Images / Screenshot of the practice:**

Fig 1: Students recollecting the concept of operators

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students felt they are able to remember the types of operators by recollecting it.
 - They felt it will be useful in applying decision making problems.
 - They said the stage fear is lessened.

- ❖ **Benefit of the practice:**

- As the students are immediately recollecting the topic it helps them to remember it for long time.
 - Understanding and remembering of the topic operators help the students to solve the expressions in C
 - It will be easy for them to learn when preparing for exams.
 - The students can improve the communication and the fear of facing audience can be reduced.

- ❖ **Challenges faced in implementation:**

- It involves only 2 members. So unable to test the understanding and recollecting capacity of the remaining students within stipulated time.
 - As it involves oral communication, unable to test the writing capacity of the students
