

Department of Computer Science and Engineering

Academic Year 2022 – 2023 (Odd Semester)

Degree, Semester & Branch: V Semester B.E CSE

Course Code & Title: CS8592 & Object Oriented Analysis and Design

Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE

Innovative Practice Description

- **Unit / Topic:** Unit 1
- **Course Outcome:** CO1
- **Topic Learning Outcome:** TLO1, 2, 3
- **Activity Chosen:** Mind Map
- **Justification:**
 - A Mind Map is a kind of diagram for representing tasks, words or concepts arranged around a central concept.
 - Unified process includes concepts such as process phases and disciplines. Use case modeling includes different types of use case formats and actors.
 - Representing all the concepts of a unified process and use case modeling in a single mind map helps the students to understand the concepts easily.
- **Time Allotted for the Activity:** 10 Minutes
- **Details of the Implementation:**
 - UP Phases, UML Diagrams, Use case modeling concepts were revised by the faculty member before the implementation of this activity.
 - The students were asked to draw a mind map for the mentioned concepts.
 - After completion each student was asked to share it with their neighbours to discuss about the mindmap they have drawn
 - Finally the minpmaps was collected by the faculty member as shown in Fig 1.

- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO10	PSO1
CO1	3	1	1	1	1

(1 – Low

2 – Moderate

3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO10	PSO1
Justification for	It helps the student to	Students will be able to	Students will be able to	Students writing skill	The recollecting/

correlation	design the diagrams for engineering problems based on their classroom learning	analyse the problem and choose appropriate usecases	identify solutions to problems using use case modeling	will be improved as they are replicating the usecase modeling they have learnt	remembering and writing skill earned through this activity helps the students in solving problems
--------------------	--	---	--	--	---

• **Images / Screenshot of the practice:**

Fig 1: Samples of Mind map activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- Students said that they had a clear understanding about the concept after the activity
- They said it would be useful to recollect the concept in short time
- They felt comfortable to ask doubts with their peers.

❖ **Benefit of the practice:**

- Mindmap activity helps the students to remember the concepts of Unified process and Use case modeling easily
- The students sharing the mind map help them to gain more understanding about the concepts
- This activity helps them to prepare easily during exam
- The students can share their gained knowledge

- Understanding and remembering of the topic help the students to solve real world problem

❖ ***Challenges faced in implementation:***

- Students who doesn't have a better understanding about all the concepts found it difficult to draw a mindmap
- Some students were unable to cover all the concepts into a mindmap within stipulated time
