

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2022 – 2023 (odd Semester)

Degree, Semester & Branch: B.E., III & ECE-B

Course Code & Title: CS3353 & C Programming and Data Structures

Name of the Faculty member (s): Mrs. G. Mareeswari

Innovative Practice Description

Unit / Topic: Unit III / Evaluation of Expression

Course Outcome: CO 3

Topic Learning Outcome: TLO 9

Activity Chosen: Think Pair Share

Justification:

- The topic “Evaluation of Expression” is the sub topic of “Application of Stack”. After teaching the concept of expression, types of expression and procedure to evaluate different types of expression, this task is given to evaluate the students’ understanding. This activity makes the students to get a sound knowledge in this concept. Students think individually about how to evaluate an expression and share their ideas with their classmates that develop their problem solving ability and communication skill. As a result, this activity will assist students to recall for their exams.
- Time Allotted for the Activity:** 20 minutes

Details of the Implementation:

- Instructor explained the concept of types of expression and procedure to solve the expression in classroom within 20 minutes.
- Based on the discussion the teacher asked the students to think about the given expression 5 minutes individually without discussing with others in the class (Think).
- Next, pair up or make a group with others in the class and discuss their points with them 5 minutes and also listen their views (Pair).
- Finally share points with the entire class (Share).
- This assisted the students in recalling the topic taught on that specific day, generating new ideas about the topic, and answering questions about the topic with ease.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO 2	3	2	2	2	2	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
	3	2	1	2	2	1
Justification for correlation	Needs engineering and mathematical knowledge for Evaluating the expression concept	The given expression is analyzed and evaluated to find the result of the expression.	Students able to design solutions for expression using the evaluation concepts	Students individually think about the expression and also share their way to solve the expression with their team.	Able to explain the way of evaluation of expression with their team members.	Able to apply this application of stack concepts in emerging trends in Information Technology

• **Images / Screenshot of the practice:**

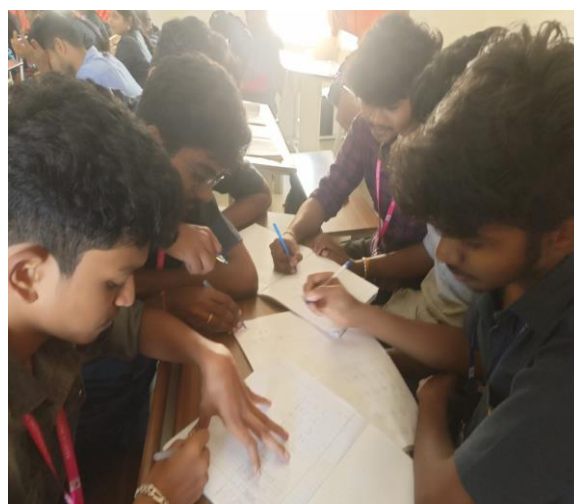

Figure:1 Glimpses of Think-Pair-Share Activity

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that this activity is very useful and got a clear idea about the concept of evaluation of expression.
- Also they can able to evaluate more expressions.

❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- From this activity, the students can get more clarity in the particular topic by discussing and sharing their views with the other students in the class.
- Coordination level among the students increased.
- Students enjoyed this learning activity and builds confidence with students.

Challenges faced in implementation:

Only a few student pairs were randomly selected to perform presentations in front of the class due to time constraints.
