

Department of Computer Science and Engineering

Academic Year 2022– 2023(Even Semester)

Degree, Semester & Branch: B.E – VI Semester CSE

Course Code & Title: CS8651 Internet Programming

Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE

Innovative Practice Description

- **Unit / Topic:** Unit III / Database connectivity
- **Course Outcome:** CO3
- **Topic Learning Outcome:** TLO7
- **Activity Chosen:** Jumbled Sequence
- **Justification:**
 - Jumbled sequence is an activity of arranging a jumbled order sentences into correct order.
 - Database connectivity allows the client software to communicate with the database server software. It involves sequence of steps such as loading the driver, connecting the database and executing the query. so the jumbled sentence activity is chosen to make the students familiar with the order of steps to be followed
- **Time Allotted for the Activity:** 05 Minutes
- **Details of the Implementation:**
 - After the completion of database connectivity, the jumbled sequence activity was conducted.
 - The students were given with the jumbled order sequence and asked to write the correct order.
 - After completion, their sheets were collected and corrected by the faculty member as shown in fig 1.
 - The mistakes were pointed out and corrected.
- **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PO12
CO3	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PO12
Justification for correlation	This activity helps the students to gain the knowledge on JDBC	Students will be able to analyse the problem and determine when to apply JDBC	Students will be able to provide solution by using JDBC	Students team work skill could be improved	Students program skill will be improved as they are involved in rearranging the code they learnt	The recollecting/ remembering and writing skill earned through this activity helps the students in solving problems related to database connectivity

- **Images /Screenshot of the practice:**

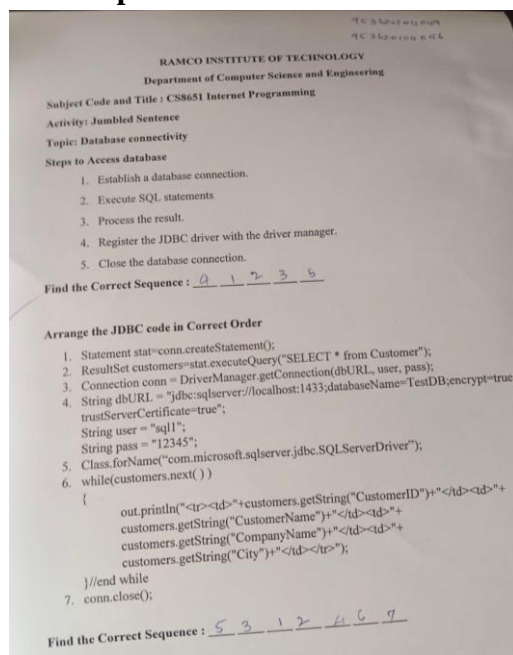

Fig 1: 953620104049,56 – Participation in jumbled sequence activity

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- The JDBC coding is clear after the activity
- They felt that the confidence level to execute the database connectivity was improved.

- ❖ **Benefit of the practice:**

- As the students are involved in arranging the jumbled order of program into correct order, it helps them to remember it for long time.
- Understanding and remembering of the JDBC topic help the students to solve the problems.
- This activity helps in testing the understanding level of the students

- ❖ **Challenges faced in implementation:**

- Few students found it difficult to rearrange the given program in correct order.
- Few students felt it was bit confusing
