

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2022 – 2023 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CS8691 Artificial Intelligence

Name of the Faculty member (s): Mrs.G.Mareeswari, AP/CSE

Innovative Practice Description

Unit / Topic: Unit IV / Architecture for Intelligent Agents

Course Outcome: CO 4

Topic Learning Outcome: TLO 10

Activity Chosen: Flash Cards

Justification:

- In unit IV, the students need to understand various topic “Architecture of Intelligent agent”. Flash cards is the tool for the learners and the card hold the information. The topic Architecture of Intelligent has more sub-topics and under each sub-topic the students need to learn more concepts. This activity helps the students to familiar with the concept in detail and also recall the concepts. This activity helps the students to understand the techniques and its complexity clearly.
- **Time Allotted for the Activity:** 20 minutes.

Details of the Implementation:

A flashcard is a method in which the questions and corresponding answers are in separate cards. Question and answer cards are prepared on the topic of Architecture of Intelligent Agent as shown in Figure 1, taught in the previous day's class. Initially, Flashcards containing questions and answers were distributed to students in the class. One student from the class displayed the question card, the other students in the class identified the cards relevant to the questions within a minute. Then the students explained the answer in front of the classroom with their answer cards, relevant to the corresponding question as shown in Figure 2. This activity helped the students to revise the different architectures of Intelligent Agent in unit IV. This will help the students to revise the particular topic.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PO9	PO10	PSO1
CO4	3	3	2	2	2	2	2

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO4	PO9	PO10	PSO1
	3	3	3	2	2	2	2
Justification for correlation	Needs engineering knowledge for understanding the architecture concept	Able to identify analyze the problem with the help of architecture of different Intelligent agents.	Able to interpret the complex engineering problems with the help of the different architectures of Intelligent Agents.	Students can be able to choose the proper intelligent agent to interpret the data to provide valid conclusion	The students could be able to present results as a team, with incorporation of helps from all individual efforts.	Able to explain concepts in detail in front of students.	Students can be able to apply intelligent agent architecture to solve complex computation task.

Figure 2 is the sample of involvement of students Harsha. R and Gayathri Devi. S in the flash card activity

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- This helped the students to identify the definition and also recalling the topic taught on that day.
 - It motivates the students to identify the term associated with each definition and questions.
 - Students said that the flash card activity is very joyful to recollect the concepts.
 - They asked to conduct more of the similar activity during class which help us to listen the class without getting bored.

- ❖ **Benefit of the practice:**

- Based on the activity student's felt that it was easy to revise the concepts.
 - Most of the students were actively participated and enjoyed among their group members once they answered correctly.
 - The impact of innovative practice in the quiz is attached Fig. 3. herewith.

Attempts: 66 out of 66

+0.73

What type of agent has the following property: "Others best interest is their best interest"

Discrimination Index ?

Agents with state	1 respondent	2 %	
Benevolent agents	63 respondents	95 %	✓
Intelligent agents	1 respondent	2 %	
Purely Reactive Agents	1 respondent	2 %	

95% answered correctly

Attempts: 66 out of 66

+0.59

Agents who decide their action without referring to earlier history is

Discrimination
Index ?

reactive agents	63 respondents	95 %	✓
Logic Agent	2 respondents	3 %	
agents with state		0 %	
BDI Agent	1 respondent	2 %	

95% answered
correctly

Fig.3: Quiz Score in the topic Architecture for Intelligent Agents

❖ **Challenges faced in implementation:**

- Few students found it difficult to understand the questions clearly and the instructor instructed the questioner to repeat the question once again clearly to make the students for clear understanding of question.
- Some students were hesitated to express the relevant answers to the question card.
