

RAMCO INSTITUTE OF TECHNOLOGY
Department of Computer Science and Engineering
Academic Year: 2019 - 2020(Odd Semester)

Degree, Semester & Branch: I Semester B.E. Civil Engineering & EEE

Course Code & Title: GE8151 & Problem Solving and Python Programming

Name of the Faculty member: Ms.P.Jothi Thilaga, AP/CSE

Date, Time & Venue: 19.10.2019, 11.15 am to 11.30 am & CRIV

Innovative practice: Cross Word Puzzle

Topic: Files and Exceptions

Type of Learning:

Active Learning

Learning Objectives:

O1: To make the students to familiarize with the file and exception concepts.

Description:

A cross word puzzle is a word game in which words that are the answers to clues are written into a pattern of numbered squares that go across and down.

Uses of Cross Word Puzzle:

- It helps the students to identify their level of understanding in the particular concept.
- It motivates the students to think, identify and recollect the file concepts and exception handling mechanism.
- It engages the students actively in the cross word puzzle.

Justification for chosen the topic:

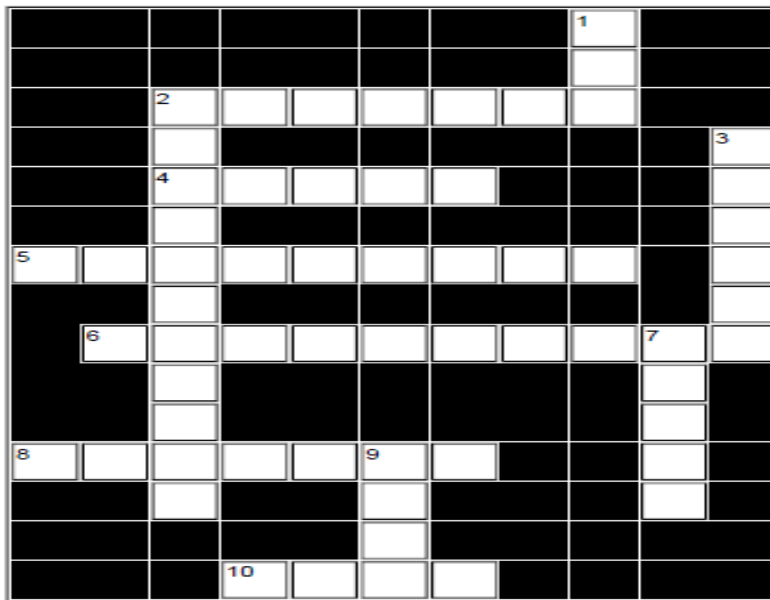

- File concept is one of the important topics in python programming. This activity makes the students to understand the file and exception handling concepts more clearly.

Implementation of Cross Word Puzzle:

- The students were given with a crossword puzzle of 11 questions individually. They have to think and provide the answers in the corresponding space given, either across or down.
- This activity was conducted with the duration of 15 minutes.
- This makes everyone to participate individually and recollect the concepts of files and exception handling.

"Files and Exceptions"

Created using the crossword generator at www.classtools.net

ACROSS

2. Statements written in _____ block are executed irrespective of whether an exception has occurred or not. (0,7)
4. _____ errors occur due to poor understanding of a problem and its solution. (0,5)
5. What type of exception is raised when two or more data types are mixed without coercion? (0,9)
6. open() function returns a _____. (0,4,6)
8. If you try to open a file for reading that does not exist, then you will get _____. (0,7)
10. When you raise an exception, its default argument is _____. (4)

DOWN

1. _____ block has all critical operations in the program. (0,3)
2. The _____ specifies a location from where the current current read or write operation is initiated. (0,4,7)
3. Which block acts as a wildcard block to handle all exceptions? (0,6)
7. _____ method frees up any system resources such as file descriptors, file locks. (0,5)
9. _____ function is used to access files. (0,4)

For the interactive version, use this link: <http://www.classtools.net/crossword/201910-Pa66C8>

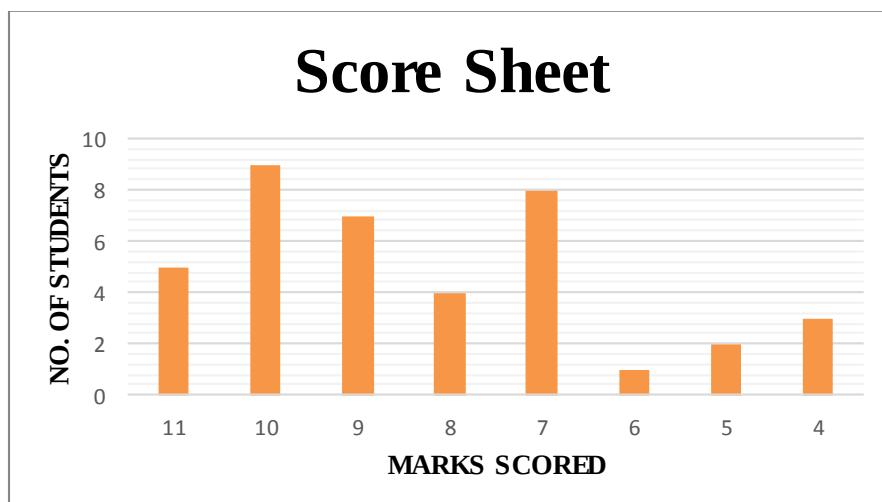

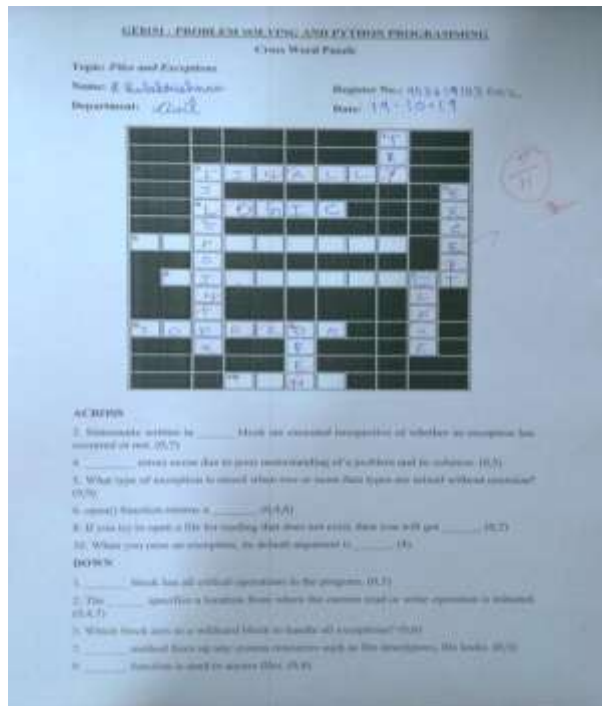

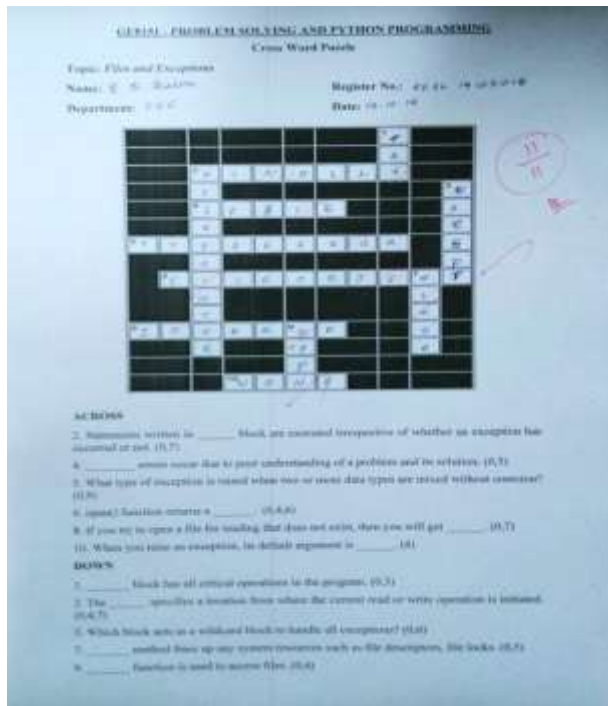

Answers:

Across

2. finally
4. logic
5. TypeError
6. file object
8. IOError
10. None

Down

1. try
2. file pointer
3. except
7. close
9. open

Outcomes:

- Through this activity the students should be able to recall the concepts easily and think individually and improve their level of understanding.
- This activity makes the students to recollect the keys concepts in files and exception handling.

Relevance to POs:

Objective	PO1	PO2	PO5	PO9	PO12
O1	3	3	2	3	1

Reflective Report:**Identified Problems**

- Few students were finding difficulties in understanding the concepts clearly and done a mistake.

Post-implementation

- This activity makes the students to recall and remember the file and exception handling concepts in an easier manner.
- They also enjoyed and actively participated in this activity.
