

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch : VI Semester B.E ECE B
Course Code & Title : CCW332 & Digital Marketing
Name of the Faculty member : Mrs. S. Vijaya Amala Devi, AP / CSE

Innovative Practice Description

- Unit / Topic: Unit V/ NP-DIGITAL TRANSFORMATION/ Web Analytics

- Course Outcome: CO5

- Topic Learning Outcome:5b

- Activity Chosen: Think-Pair-Share

- Justification

- ❖ The purpose of the activity is to evaluate the understanding of every student on an individual basis by promoting peer knowledge sharing and independent thinking. Web analytics requires an understanding of the strategy.
- ❖ In addition to offering students a chance to showcase their individual comprehension, the "think-pair-share" practice fosters collaborative learning.

- Time Allotted for the Activity: 40 Minutes

- Details of the Implementation:

- ❖ Think-Pair-Share innovative practice conducted after explanation of the concept of Web analytics.
- ❖ I initiated the process by prompting the students to reflect on the concept of Web analytics. Specifically, I asked them to consider the use of web analytics in digital marketing. Subsequently, the students actively engaged with this concept by applying the steps involved in changing the analytics.
- ❖ After the students had completed their individual I grouped them into pairs and prompted them to communicate and explain the steps they had taken to arrive at their results to their respective partners.
- ❖ Finally, I asked any two or three pairs to explain the concept to whole class for further discussion. The students shared their ideas and knowledge of how web analytics works in this program.
- ❖ The instructor finally discussed with answer.

- CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO5	3	3	2	1	1	1

(1 – Low

2 – Moderate

3 – High)

• **PO / PSO mapped:**

Innovation Practice	PO1 3	PO2 3	PO3 2	PO4 1	PO9 1	PO10 1
Justification for Correlation	The activity included thinking and made the students able to think about problem solving approaches	Students were able to approach the program by applying what they learned	Able to design solutions for Web analytics	Able to analyze and apply visualization libraries in python and provide valid conclusions	As students for the were involved in the activity as a team, functions. their teamwork skills improved.	Students communication Skills improved as they faced the audience and communicated the activity

• **Images / Screenshot of the practice:**

Figure1: Discussion with team members regarding the web analytics

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The students felt that by working independently first and then discussing their solutions with a partner, they were prompted to think critically about the problem and evaluate different solutions.

❖ **Feedback of practice from students and other stakeholders:**

- This activity serves as an opportunity for students to review and reinforce their understanding of Data Visualization techniques. It allows them to revisit and recall the key concepts while focusing on areas where they may be unclear.
- The activity helped the instructor to analyze, evaluate and improve their own learning.

- Various types of programming questions are deliberated in the classroom, providing students with a comprehensive understanding of how to approach and solve them.

❖ **Benefit of the practice:**

- The activity promoted communication skills as students expressed their thoughts, explained their solutions to their partners, and participated in the class-wide sharing session.
- From this activity, the students can get more clarity in the particular topic.
- This practice has made the class more interactive than the conventional practice

❖ **Challenges faced in implementation**

- In some pairs, one student may dominate the discussion while the other remains passive. This can hinder the effectiveness of the activity as it doesn't fully engage all students.
- Some students may feel uncomfortable sharing their thoughts with a partner or the whole class, especially if they are shy or lack confidence in their abilities.
