

Department of Computer Science and Engineering
Academic Year 2021– 2022(Even Semester)

Degree, Semester & Branch: B.E – II Semester CSE

Course Code & Title: CS3251 Programming in C

Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE

Innovative Practice Description

- **Unit / Topic: Unit IV / Structures and Unions**
- **Course Outcome: CO4**
- **Topic Learning Outcome: TLO9, 10, 11**
- **Activity Chosen: Mind Map**
- **Justification:**
 - A Mind Map is a diagram for representing tasks, words or concepts arranged around a central concept
 - Structure and Union involves concepts such as nested structures, array of structures, pointer and structures, self referential structures and union
 - Representing all the concepts of a structures and union in a single mind map helps the students to understand easily.
- **Time Allotted for the Activity: 10 Minutes**
- **Details of the Implementation:**
 - Array of structure, nested structure, self referential structure, pointer and structure, union concepts were revised by the faculty before the implementation of this activity
 - The students were asked to draw a mind map for the mentioned concepts
 - After completion each student was asked to share it with their neighbours to discuss about the mindmap they have drawn.
 - Finally the minpmaps was collected by the faculty member as shown in Fig 1.
- **CO – PO / PSO mapping (specific to this activity):**

CO	PO1	PO2	PO3	PO10	PSO1
CO2	3	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

- **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO10	PSO1
Justification for correlation	It helps the student to apply the structure and union concepts they learnt in classroom.	Students will be able to analyse the problem and choose appropriate concept of structure to implement it	Students will be able to provide solutions to problems using array of structure, pointer to structure and union	Students writing and programming skill will be improved as they are replicating the structure concept they have learnt	The recollecting/remembering and writing skill earned through this activity helps the students in solving problems related to structures

- **Images / Screenshot of the practice:**

Fig 1: Samples of Mind map activity

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students said that they had a clear understanding about the concept after the activity
 - They said it would be useful to recollect the concept in short time
 - They asked to share a best mindmaps in the common group to have it as a reference for future use.

- ❖ **Benefit of the practice:**

- Mindmap activity helps the students to remember the concepts of structure and union easily
 - The students sharing the mind map help them to gain more understanding about the concepts
 - This activity helps them to prepare easily during exam
 - It could be helpful while implementing programs in laboratory

- ❖ **Challenges faced in implementation:**

- Students who doesn't have a better understanding about all the concepts found it difficult to draw a mindmap
 - Students who are not good in programming were messed up the concepts while drawing
 - Some students were unable to cover all the concepts into a mindmap within stipulated time
