

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2021 – 2022 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CS8602 Compiler Design

Name of the Faculty member (s): Mrs.B.Vijayalakshmi, AP (SG)/CSE

Innovative Practice Description

- Unit / Topic: Unit IV / Storage Organization**

- Course Outcome: CO4**

- Topic Learning Outcome: TLO11**

- Activity Chosen: Crossword Puzzle**

- Justification:**

Different types of storage organizations and the data stored in each type of memory can be easily paired with the help of crossword puzzle which leads to the greater retention of the data among the students.

- Time Allotted for the Activity: 10 Minutes**

- Details of the Implementation:**

- A crossword puzzle is a fun word game that encourages students to remember the idea and try to figure out the solution on their own. Instead of administering standard MCQ tests, it sparks pupils' curiosity.
- The activity was conducted in a classroom for a duration of 10 minutes. The students were given 10 questions as a crossword puzzle in the topic of storage organization. They have to think and write the answers in the given puzzle.
- The activity was conducted during the last 10 minutes of the class after that the answers were corrected. Sample answers were shown in figure 1. The answers for the wrong questions were discussed at the end of the class to make them to know the answer of all the questions.

- CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO5	PO9	PO10	PO12	PSO1	PSO2	PSO3
CO4	3	1	1	1	2	1	2	2	1	1

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PSO1
	3	2	2	2	1
Justification for correlation	The students apply the knowledge of storage organization	The students analyze the given questions	The students find the solutions for the given question.	The students demonstrate problem-solving	The students apply the storage organization concepts for

		and identify solutions		skills as a team.	developing software

Unit IV Storage Organization

Across

5. to support heap memory management
6. pointing to the activation record of the caller
8. grows and shrinks with the chain of function calls.
9. To access the non local data
10. Dynamically allocated data *Heap*

Down

1. information about the state of the machine just before the call to procedures. *machine status*
2. whose value is the address of the next instruction to be executed. *PC*
3. Execution of a procedure call
4. Stores activation record *-Stack*
7. Global constants are stored in this location

Fig 1: Sample Answers

• Reflective Critique:

❖ Feedback of practice from students and other stakeholders:

- Some of the students find very easy to identify the different memory where the particular data are stored.
- Some of them take more time to complete the puzzle need more clarification on the various classes.

❖ Benefit of the practice: (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

It helps the students to think on their own and identify the storage location of the variables while the programs are being executed and how to access the data dynamically. The students level of understanding on this topic gets increased.

❖ Challenges faced in implementation:

- The students who didn't understand the concept clearly were unable to complete it within the allotted time

- Few of them were struggled to find the answer for the questions.
