

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering Academic Year 2022 – 2023 (Odd Semester)

Degree, Semester & Branch: I Semester B.E. CSE 'A'

Course Code & Title: GE3151 Problem Solving and Python Programming

Name of the Faculty member (s): Mrs.B.Vijayalakshmi, AP (SG)/CSE

Innovative Practice Description

- Unit / Topic: Unit III / String functions and Methods**

- Course Outcome: CO3**

- Topic Learning Outcome: TLO9**

- Activity Chosen: Code Completion**

- Justification:**

Strings are the important concept which has many built in methods for processing. In order to remember and recollect how to apply these methods and also to familiarize the syntax, a code completion activity is given to the students.

- Time Allotted for the Activity: 10 Minutes**

- Details of the Implementation:**

- Students were asked to form a team of two members for this activity. Two different set of questions were designed.
- In this activity, each team was given with a python code snippet in which partially completed code is given. The students have to fill the incomplete code for getting the given output. For some questions the students have to predict the answers. The partial code and task are related to the string methods such as split, replace, testing string equality, string slicing which is shown in Fig 1.
- The activity was conducted during the last 15 minutes of the class. In the first 10 minutes the students have to think and identify the methods to complete the required task in the given code. The students involvement is shown in Fig.2.
- At the end of the activity, the answers for the questions were discussed by the student team members.

- CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO5	PO8	PO9	PO10	PO12	PSO1	PSO2	PSO3
CO3	3	2	2	2	1	1	1	1	3	2	3

(1 – Low 2 – Moderate 3 – High)

- PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1	PSO2	PSO3
	3	2	2	1	1	3	1	1

Justification for correlation	The basic knowledge about strings is needed	The students analyze the given partial code.	The students find solution to solve the given coding questions.	The students coordinate and demonstrate the activity as a team.	The students communicate the solutions to the others	The concept is used in developing the software	The concept is used in security applications	The concept is used in solving problems in AI

Fig 2: Students Involvement

- **Reflective Critique:**

- ❖ ***Feedback of practice from students and other stakeholders:***

- The students feel it is very interesting to fill the partial code and they are able to recollect the string methods easily.

- ❖ ***Benefit of the practice:*** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- It helps the students to remember, recollect and apply the various string methods in different scenario.

- ❖ ***Challenges faced in implementation:***

- Some of the students those who does not remember the string operations felt difficult to find answers.
