

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2019- 2020 (Even Semester)

Date: 17.02.2020

Degree, Semester & Branch: II Semester B.E. Computer Science and Engineering

Course Code & Title: CS8251 Programming in C

Name of the Faculty member: Dr.K.Vijayaalskhmi & Mrs.B.Vijayalakshmi

Innovative practice: Active Learning- Crossword Puzzle

Topic: Built in Functions

Objectives of the activity:

- To enable the students to familiarize the concepts of functions and its classifications.

Justification for choosing the topic:

Various Built-in functions were available in C, in order to make the students to remember and recollect the different functions a game based activity was chosen instead of carrying out regular multiple choice question test.

Activity:

A crossword is an interesting word puzzle activity which helps the students to recollect the concept and try to find out the answer individually. It is one type of game, so this an enjoyable activity rather than regular multiple choice questions test.

The activity was conducted in a classroom for duration of 15 minutes. The students were given with a crossword puzzle of 11 questions in a paper. They have to think and provide the answers in the given puzzle.

The students answered the questions in the starting 15 minutes of the class after that the answers were corrected. Sample answers were shown in figure 2&3. The answers for the wrong questions were discussed at the end of the class to make them to know the answer of all the questions.

Outcome:

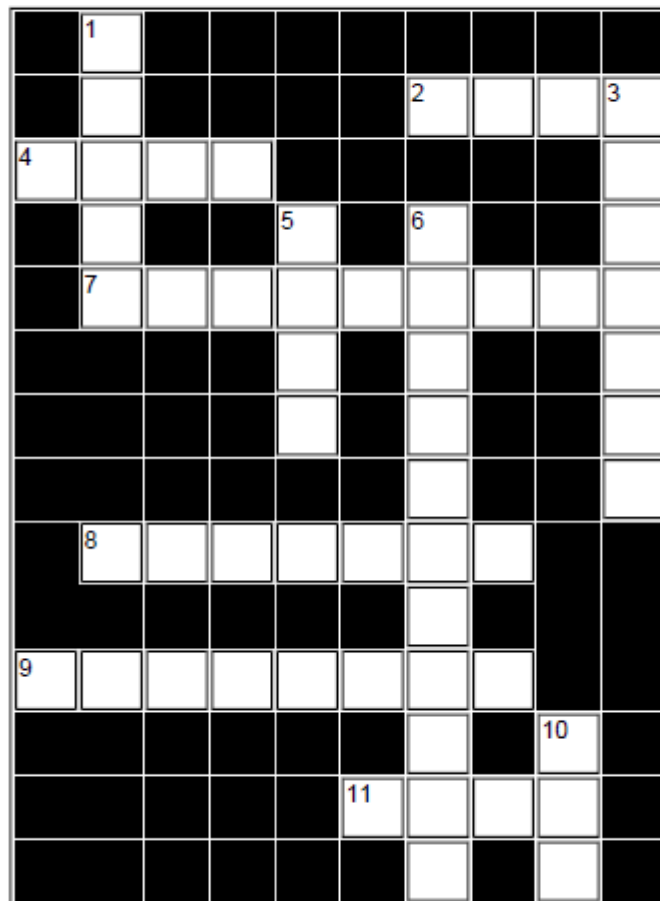

- Based on the answers provided by the students, analysis was performed and it is given as a chart in figure 1.
- From that we can find out that, most of the students had familiarity with the various built in functions in C.
- This activity helped the students to think individually, recall information and improve their problem solving skills.

Relevance Mapping - This activity helps in attaining the following Objectives – PO mapping:

Objectives/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
O1	3	1	-	-	-	-	-	-	3	-	-	1

"Crossword Puzzle on Functions"

Created using the crossword generator at www.classtools.net

ACROSS

2. Which function is used to read a string of multiple lines? (0,4)
4. By default, a function returns a value of type _____ (0,4)
7. A function which calls itself again and again is called _____ (0,9)
8. _____ function is used to convert a character into uppercase (0,7)

9. _____ function is used to check whether the given character is a digit or not. (0,8)

11. What is the value returned by strcmp when both the strings are equal? (0,4)

DOWN

1. This function returns the nearest integer which is less than or equal to the argument passed to this function. (0,5)

3. Which functions is used to append n characters from one string to another string (0,7)

5. Which is a string terminating character? (0,4)

6. Functions defined by a user is called_____ (0,4,7)

10. Which function is used to find the exponent value for a given number x, y (0,3)

Answer:

1.floor

7.recursion

2.gets

8.toupper

3.strncat

9.isdigit

4.void

10.pow

5.NULL

11. zero

6.user defined

Reflective Report

Pre-implementation:

Identified Challenges:

- Few students do not recollect the different functions clearly wrote wrong answers.

Post implementation

- All the students enthusiastically participated and enjoyed this game like activity.
- They can easily remember the basic definitions and the uses of various built in functions like string functions and math functions.
