

RAMCO INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

Academic Year: 2023-2024(Odd Semester)

INNOVATIVE TEACHING PRACTICES

Degree, Semester& Branch: V Semester B.E. CSE

Course Code & Title: CCS375 Web Technologies

Name of the Faculty member: Mr. C.A.Yogaraja

Date & Time: 08.08.2023 & 2:20 P.M

Topic: CSS Backgrounds, Shadows, borders

Lecture No.: 6

Practice's followed: Real Word Learning

Type of Learning: Authentic Learning

Learning Objectives:

Objective	Statements
O1	To make students to familiarize different styling techniques

Real Word Learning

Real-world learning takes students directly into the real world, to explore course topics hands-on. The way it can help support students in becoming familiar with the professional environment.

Unlike traditional classroom learning, which is all about getting to the right answer, real world learning puts more value on the learning process itself. The skills and knowledge you learn along the way are much more important than the final product created, as these skills can be used for years to come.

Benefits of Real World Learning:

Helps students to get realize the styles used in real applications

- Provides an opportunity to grab the ideas
- provides a platform for the Critical Thinking, Lifelong Learning and deep learning.

Justification for chosen the topic:

Web development is the important skill, which can turn an individual to entrepreneur with his/her skill set. Being a computer science students it is essential to design the UI for their projects.

Activity:

Web development is the separate stream in the current IT era.

In this activity,

- Students are asked to install add-on "CSSViewer" to chrome.
- Each student is supposed to go through any website and should find the different styles applied over the HTML content
- The new properties that has not discussed are explained then and there for the student with real time learning exposure.

OUTCOME:

Finally, students have able to realize the uses of different styling that can be applied in the web pages.

Reflective Report:

Pre-implementation:

Identified Challenges:

- Availability of the Laboratory with internet facility.
- Chances of few students to deviate from the plan.

Addressing Challenges:

- A day before, the lab was booked and informed about the need of internet facility and add-on named “CSSViewer” was identified for easy access to know the styles applied in a webpage.
- Addressed the importance of styles using in the web pages and how it can be easy for the developer to change in future.
- Before this activity, I shown the website www.ritrjpm.ac.in with the add-on tool to create interest among students for this activity.

Post-implementation:

- With the measures taken initially, the activity is carried out smoothly with maximum commitment from students
- They involved enthusiastically in finding the new styling that has been used in the webpages.
- Everyone identified as many new properties that has not discussed in the classroom.
- Students able to get the clear picture about the styles adopting in the web development.
