

RAMCO INSTITUTE OF TECHNOLOGY

Approved by AICTE, New Delhi & Affiliated to Anna University
Accredited by NAAC & An ISO 9001:2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE and MECH

Department of Computer Science and Engineering

Academic Year 2023 – 2024 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title :CCS339 Cryptocurrency and Blockchain technologies

Name of the Faculty member (s): Mrs.S.Manjula

Innovative Practice Description

Unit / Topic: Unit I / Block in a Blockchain

Course Outcome: CO 1

Unit Learning Outcome: 1a

Activity Chosen: Mind map

Justification:

Mind Map

- A mind map is a visual representation of thoughts and ideas, serving as a powerful tool for organizing information. It enables quick capture of ideas, aiding students in identifying theoretical concepts within the image. This method enhances memory retention, making it easier for students to recall information during exams.
- **Time Allotted for the Activity:** 20 minutes

Details of the Implementation:

- The instructor explained the block in block chain in the classroom on 02.02.2024.
- After discussing the topic and addressing students' doubts, the teacher instructed them to create a mind map related to the topic within 20 minutes.
- Each student created a mind map based on their level of understanding, and the instructor collected the sheets.
- This exercise helped students recall the day's lesson, generate new ideas about the topic, and answer questions with ease.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO4	PSO1
CO 1	2	2	2	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO3	PO4	PSO1
	2	2	2	1	1
Justification for correlation	Students acquired in-depth knowledge of abstract models of blockchain technology.	Students will analyze blockchain use cases and scenarios	Students will design and develop blockchain-based solutions	Students will investigate complex problems related to abstract blockchain models, exploring potential improvements and innovative approaches.	Students will be able to apply their knowledge of cryptography to the development of software.

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Muthulakshmi J informed the instructor that she could break down complex concepts into simpler, more manageable parts and also the visual representation helped her to recall information quickly.
 - Shamiksha R told that she enjoyed the creative aspect of drawing and organizing her thoughts.

- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)

- This activity helps students recall the most important information using keywords, and visually connect facts and ideas.
 - It simplifies note-taking by condensing pages of notes into a single sheet, making it easier for students, including slow learners, to remember information quickly.
 - Through this activity, students gain greater clarity on the topic.

- ❖ **Challenges faced in implementation:**

- Maintaining student interest and motivation during mind map creation can be difficult. Some students may view the activity as monotonous or find it hard to engage with the visual and creative aspects.
