

**Department of Computer Science and Engineering**  
**Academic Year 2023– 2024(Odd Semester)**

**Degree, Semester & Branch: B.E – III Semester CSE-‘B’**

**Course Code & Title: CS3391 Object Oriented Programming**

**Name of the Faculty member (s): Ms.G.Sakthi Priya, AP/CSE**

**Innovative Practice Description**

- **Unit / Topic: Unit I / Arrays, Operators and Control Statements**
- **Course Outcome: CO1**
- **Topic Learning Outcome: TLO2**
- **Activity Chosen: Exit Slip**
- **Justification:**
  - Exit Slip is an activity used to gauge students' understanding of a lesson and to gather feedback on the day's instruction. It is typically administered at the end of a lesson or class period. The purpose of an exit slip is to assess what students have learned and identify areas where further clarification may be needed.
  - Arrays, operators and control statements are the basic concepts the students must have a clear understanding. This activity is chosen to analyse the understanding level of the mentioned concepts
- **Time Allotted for the Activity: 05 Minutes**
- **Details of the Implementation:**
  - After the detailed lecture on the topics “arrays, operators and conditional statements”, the exit slip activity was conducted.
  - The students were asked to write answers for three questions
  - 1. Things I have Learned
  - 2. Things I still need to learn
  - 3. Questions I have
  - After completion, their sheets were as shown in fig 1.
- **CO – PO / PSO mapping:**

| CO  | PO1 | PO2 | PO9 | PO12 | PSO1 |
|-----|-----|-----|-----|------|------|
| CO3 | 1   | 1   | 1   | 1    | 1    |

(1 – Low          2 – Moderate          3 – High)

- **PO / PSO mapped:**

| Innovative practice                  | PO1                                                                   | PO2                                                         | PO9                                                        | PO12                                                                                                                | PSO1                                                                       |
|--------------------------------------|-----------------------------------------------------------------------|-------------------------------------------------------------|------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| <b>Justification for correlation</b> | This activity helps the students to find their level of understanding | Students will be able to analyse where they need to improve | Students individual self analyzing skill could be improved | The recollecting/ remembering and writing skill earned through this activity helps the students in solving problems | Students will be develop applications through the knowledge gained on self |

|  |                                                      |  |  |                                                           |           |
|--|------------------------------------------------------|--|--|-----------------------------------------------------------|-----------|
|  | on arrays,<br>operators and<br>control<br>statements |  |  | related to arrays,<br>operators and<br>control statements | analyzing |
|--|------------------------------------------------------|--|--|-----------------------------------------------------------|-----------|

• **Images / Screenshot of the practice:**

**Fig 1: 953622104023,118 – Participation in exit slip activity**

• **Reflective Critique:**

❖ **Feedback of practice from students and other stakeholders:**

- The self analyzing activity helps to identify the areas to be improved
- It helps to identify and explore a lot on the topics which has less understanding

❖ **Benefit of the practice:**

- Quick Assessment: Exit slips provide a snapshot of students' understanding in a short amount of time.
- Feedback Loop: It create a feedback loop between teachers and students, helping to modify instruction to students' needs.
- Active Engagement: Students are actively engaged in reflecting on their learning.

❖ **Challenges faced in implementation:**

- Reviewing and analyzing exit slips from an entire class can be time-consuming
- Some students may view exit slips as a low-stakes activity and may not put in their best effort when responding. Ensuring that students take exit slips seriously can be a challenge.
