

Department of Computer Science and Engineering

Academic Year 2024 – 2025 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE - A

Course Code & Title: CCW332 - Digital Marketing

Name of the Faculty member (s): Dr.R.Venkatesh, ASP/CSE

Innovative Practice Description

1. Unit / Topic: Unit V / Changing your strategy based on analysis

- **Course Outcome:** CO5
- **Topic Learning Outcome/UO:** 5b
- **Activity Chosen:** Think-Pair-Share
- **Date of Implementation:** 02.05.2025

- **Justification:**

The topic “Changing Your Strategy Based on Analysis” is vital in digital marketing as it empowers students to understand the importance of adapting strategies based on performance metrics and real-time data. This interactive Think–Pair–Share activity helps students relate theoretical concepts to practical marketing challenges, improving analytical thinking, creativity, and communication skills.

Time Allotted for the Activity:

- **Procedure of the Implementation:**

- Collaborative, active learning strategy, in which students work on a problem posed by instructor, first individually (Think), then in pairs (Pair) or groups, and finally together with the entire class (Share).
- T (Think): Teacher asks a specific question about the topic. Students "think" about what they know or have learned, and come up with their own individual answer to the question. [Takes 1-5 Minutes].
- P (Pair): Teacher asks another question, related to the previous one, that is suitable to deepen the students’ understanding of the topic. Each student is paired with another student. They share their thinking with each other and proceed with the task. [Takes 2-5 Minutes].
- S (Share): Students share their thinking (or solution) with the entire class. Teacher moderates the discussion and highlights important points. [Takes 05-10 minutes].

Details of the Implementation

The Think–Pair–Share (TPS) activity was designed to help students understand how to adapt digital marketing strategies based on data-driven analysis. The session was conducted in three phases:

- The instructor introduced the topic “**Changing Your Strategy Based on Analysis**” and explained its significance in digital marketing.
- Supporting materials, including case studies such as the Netflix origin story, Nokia's decline, and Coca-Cola’s “New Coke” backlash and strategy reversal, along with study materials from real-world campaigns, were distributed to provide context.

- **Think Phase (1 - 5 minutes):**

The instructor posed a question like: “How would you modify a digital marketing campaign if analytics show a drop in engagement rate?”. Each student reflected individually on their thoughts and strategies.

- **Pair Phase (2 - 5 minutes):**

Each student paired with a classmate to discuss their ideas. They compared their reasoning, clarified doubts, and refined their strategies based on peer insights.

- **Share Phase (5 -10 minutes):**

Each pair or group presented their collective strategy to the class. Presentations included justifications based on analytical data, target audience behaviour, and proposed changes in digital channels or content. The instructor moderated the discussion, asking follow-up questions to deepen understanding and connect student responses to course concepts.

- The Figure 1 shows the Think Pair Share activity done by the students.
- Finally, teacher and students discussed the answers of all questions at the end of the activity.

CO – PO / PSO mapping:

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO1	3	3	3	2	3	2

(1 – Low 2 – Moderate 3 – High)

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	Students understand how to interpret performance metrics and apply analytical skills.	Students learn to select suitable tools and techniques for data-driven strategy adjustments.	Students practice creating revised marketing strategies based on performance analysis.	Team collaboration is enhanced through peer discussion in the Pair and Share phases.	Oral communication and presentation skills are improved as students share and justify their decisions.	Analytical thinking and real-world digital marketing application are strengthened through problem-solving tasks.

(Aswath V, Karthick Sri Ram A and Sathasin P shared the Topic)

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**
- ❖ Most of the students actively participated and enjoyed. Students were given a solution with various formats.
- ❖ Bright students enjoyed with peer learning.
- ❖ **Benefit of the practice:** (E.g.: Outcome attainment would have increased due to innovative practice over conventional practice)
 - Students are actively engaged.
 - Students learn from each other.
 - Makes class interactive.
 - Builds a friendly, yet academic atmosphere.
 - Includes all the students in the teaching-learning process.

Challenges faced in implementation:

- Students were not aware of TPS even though made an announcement and posted the content of TPS in the course web site.
- Slow learners were not interested to participate in TPS.
- Noise level of the class room goes up and a transition was needed to get back on the topic.
- It was hard to keep every student on task.
- It took a longer time than other strategies.
