

Department of Computer Science and Engineering

Academic Year 2022 – 2023(Odd Semester)

Degree, Semester & Branch: I Semester B. Tech Information Technology

Course Code & Title: GE3151 Problem solving and python programming

Name of the Faculty member (s): Dr. R. Venkatesh, AP(SG)/CSE

Innovative Practice Description

- **Unit / Topic:** Unit V / Files, Exception, Modules and Packages
- **Course Outcome:** CO5
- **Topic Learning Outcome:** TLO15
- **Activity Chosen:** Flash Cards
- **Justification:**
 - Flash card is a card bearing information which is intended to be used as an aid in memorization
 - Files, Exception, Modules and Packages are one of the important concepts in python programming. Understanding of the exceptions and packages helps the students to implement AI and ML projects effectively.
 - To have a good remembrance and understanding, the flash card activity is chosen for the topic “Files, Exception, Modules and Packages”
- **Time Allotted for the Activity:** 15 Minutes
- **Pre Implementation:**
 - Two types of Flash cards were prepared. One containing question and other card containing answers as shown in Fig 1.
 - Flash card with questions is not shuffled with the cards containing answers
- **Details of the Implementation:**
 - Questions and answers were prepared in a card.
 - Question cards were distributed to certain group of students and answer cards were distributed to few group of students.
 - Student who is having the answer read out the card. Other students listened to the question and found out the question for that answer.
 - Student who is having the respective question card explained the question and answer for the question to the entire class

• **CO – PO / PSO mapping:**

CO	PO1	PO2	PO3	PO9	PO10	PSO1
CO2	2	1	1	1	1	1

(1 – Low 2 – Moderate 3 – High)

• **PO / PSO mapped:**

Innovative practice	PO1	PO2	PO3	PO9	PO10	PSO1
Justification for correlation	Students will be able to understand the concept of modules and packages	Students will be able to choose the appropriate module and packages while approaching the problem	Students will be able to provide solution for the problem by applying modules and packages	As the student involved in the activity as a team of two, the team work skill improved	Students communication skill will be improved as they are discussing the answers with peers	The problem solving skill earned through this activity helps the students in solving various problems

• **Images / Screenshot of the practice:**

Fig 1: Sample Flash cards

Fig 2: Students involvement in Flash Card Activity

- **Reflective Critique:**

- ❖ **Feedback of practice from students and other stakeholders:**

- Students said that the flash card activity is very joyful to recollect the modules and packages concepts.
 - They asked to conduct more of the similar activity during class which help us to listen the class without getting bored.

- ❖ **Benefit of the practice:**

- Students understanding is improved for the concepts modules and packages
 - Students memorization and remembrance is improved

- ❖ **Challenges faced in implementation:**

- Few students found it difficult to find the corresponding flash card which containing answer.
 - Unable to use programming questions and its output in this activity because the programming question can't be dictated.
