

RAMCO INSTITUTE OF TECHNOLOGY

(An Autonomous Institution)

Approved by AICTE, New Delhi & Affiliated to Anna University
NAAC Accredited with 'A+' Grade & An ISO 9001: 2015 Certified Institution
NBA Accredited UG Programs: CSE, EEE, ECE, MECH and CIVIL

Department of Computer Science and Engineering

Academic Year: 2025 - 2026 (Even Semester)

Degree, Semester & Branch: VI Semester B.E. CSE

Course Code & Title: CCW332 & Digital Marketing

Faculty member (s): Mrs. P. Devisri, AP/CSE

Innovative Practice Description Unit Topic: Unit IV / Engagement Marketing

Course Outcome: CO 4

Topic Learning Outcome: 4a

Activity Chosen: Fix the Low-Engagement Post – Engagement Marketing

Justification:

Engagement Marketing is a pivotal component of Digital Marketing that focuses on creating meaningful interactions between a brand and its audience to build loyalty and drive conversions. The Fix the Low-Engagement Post activity challenged students to critically analyze underperforming social media content, identify engagement gaps, and redesign posts using proven engagement strategies such as storytelling, interactive elements, strong CTAs, and optimized visuals. This hands-on activity helped students understand how audience behavior influences content performance and how data-driven decisions can boost organic reach and brand engagement.

Date of Activity: 17/03/2026

Time Allotted for the Activity: 35 minutes

Details of the Implementation:

- At the beginning of the session, the faculty introduced the concept of Engagement Marketing, explaining how audience interaction, content quality, and platform algorithms determine the reach and impact of social media posts.
- Students were divided into small teams and each team was given a sample low-engagement post from a fictional brand to diagnose and redesign.
- M.Arunadevi (Figure 1) – She analyzed a low-engagement Instagram post for their chosen brand, GlowSkin Cosmetics, a skincare brand targeting young adults.
- The team identified the following key steps:

1. Diagnose the Low-Engagement Post:

- Vague caption with no CTA
- Low-quality image with no brand colors
- No hashtags or incorrect hashtags

2. Identify Target Audience:

- College students and working women aged 18–30
- Skincare enthusiasts looking for affordable products

3. Engagement Gap Analysis:

- Low likes and zero comments due to generic content
- No storytelling or emotional connection

4. Content Redesign Strategies:

- Craft a compelling hook in the first line

- Use relatable storytelling (“Morning routine with GlowSkin”)
- Add interactive elements: polls, questions, giveaways

5. CTA Optimization:

- “Comment your skin type below!”
- “Tag a friend who needs this!”
- “Save this post for your night routine!”

6. Visual & Format Improvements:

- Use brand-consistent colors (pastel tones)
- Add before-and-after visuals for credibility
- Include product close-up shots with natural lighting

7. Hashtag Strategy:

- #SkincareRoutine #GlowUpChallenge #NaturalSkincare
- Mix of broad and niche hashtags (10–15 per post)

8. Posting Time Optimization:

- Post during peak engagement windows: 7–9 AM and 7–9 PM
- Use Instagram Insights to track audience activity

9. Engagement Monitoring:

- Track likes, comments, shares, saves, and reach weekly
- A/B test two versions of the redesigned post

10. Iterate and Improve:

- Refine content based on what resonates most with the audience
- Repurpose high-performing posts for Stories and Reels

To validate their redesign, the team used Meta Business Suite Insights (Figure 2) to compare engagement metrics of the original low-performing post versus their redesigned version, demonstrating a significant improvement in reach, saves, and comments, confirming that targeted engagement strategies directly impact content performance.

- The team briefly presented their Fixed Post and Engagement Strategy, explaining how each redesign decision contributes to higher audience interaction and brand visibility.

CO – PO / PSO mapping:

CO	PO1	PO2	PO10	PSO1
CO 4	2	2	1	1

(1 – Low 2 – Moderate 3 – High)

PO / PSO mapped:

Innovative practice	PO1	PO2	PO10	PSO1
	2	2	1	1
Justification for correlation	Students applied engagement marketing strategies using analytical and creative thinking.	Students analyzed audience behavior and diagnosed content performance gaps.	Students enhanced communication skills by presenting redesigned post strategies effectively.	Students gained practical exposure to real-world social media engagement optimization techniques.

Reflective Critique:

Feedback of practice from students and other stakeholders:

- Students found the Fix the Low-Engagement Post activity highly relatable and practical, as it connected engagement marketing concepts to real social media scenarios they encounter daily.
- The structured diagnostic approach helped students understand why certain posts underperform and how small changes in content strategy can significantly boost engagement.
- Students felt confident redesigning content using engagement best practices after the activity.
- Peer critique sessions and comparative analysis of before-and-after posts encouraged creative thinking and strategic decision-making.

Benefit of the practice:

- Improved understanding of social media engagement strategies and content optimization.
- Enhanced creative and analytical skills in diagnosing and redesigning underperforming content.

- Encouraged teamwork and peer-based learning.
- Bridged the gap between digital marketing theory and practical social media management.

Challenges faced in implementation:

- Some students initially found it difficult to objectively critique content without subjective bias.
- Managing time for both diagnosis and full redesign within a single session was challenging.
